INTRODUCTION

Belt driven LC Dynafans offer a wide range of sizes with capacities extending over 17,000 CFM. Units are low and inconspicuous, with a unique design that features motor mounting beside the wheel rather than atop the wheel. Large wheels turning at moderate speeds provide quieter operation and airstream cooling for the motors and bearings. Units float on vibration isolators. Belts, ball bearing motors, sheaves, and self-aligning ball bearings are all standard brands of national manufacturers. All components are selected for durability, efficiency and value.

PennBarry's LC Dynafan units are completely self-contained, packaged exhaust systems. Direct drive units are especially effective at providing a quiet steady exhaust at moderate resistance. Direct drive units offer extensive performance flexibility when used with the Lek-Trol™ speed controller. Lek-Trol™ switches employ solid state circuitry to enable air movement adjustment from full to half of capacity. Additional Dynafan construction features include low profile housings of sturdy steel or durable aluminum, dynafoil impellers, and a strong welded and reinforced chassis. These housings are removable or hinged for easy access to all components and can be fitted with expanded metal bird and debris guards.

Model: LC Direct Drive

- Static pressure up to 1.5" wg.
- Flow capacity up to 2,072 CFM

Model: LC Belt Drive

- Static pressure up to 1.25" wg.
- Flow capacity up to 17,516 CFM

CERTIFICATIONS & LISTINGS

AMCA Certification

PennBarry certifies that the LC Dynafan models shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA publication 211 and AMCA publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

cULus Certification

PennBarry LC Dynafan exhausters carry the UL label, UL705 (ZACT/ZACT7), file #E28413.

LC | DIRECT DRIVE

Performance Data Overview

LC Dynafan direct drive models are available with single and multi-speed motors. Multi-speed motors are designated V (1050 RPM), S (1300 RPM), and R (1550 RPM). A single LC Dynafan may be made suitable for several requirements by a simple wiring change. This feature provides flexibility for a variety of reasons, including energy savings, off-hours requirements, future expansion, or unexpected field variations.

LC Dynafan direct drive models are available in two sizes (6 and 12). Capacities range from below 150 CFM to above 2,000 CFM, with static pressures beyond 1 1/4".

When compared to belt drive models, LC Dynafan direct drive fans require less maintenance, have a simpler construction, cost less, and are lighter in weight.

Performances in 50 Hz applications will be less than shown below; consult with local PennBarry representative.

Performance certified is for installation type A: Free Inlet, Free Outlet. Speed (RPM) shown is nominal. Performance is based on actual speed of test. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for Installation Type A: free inlet hemispherical sone levels. Performance ratings include the effects of screen in the airstream. For models shown on this page, the AMCA Certified Ratings Seal applies to air and sound. Watt ratings shown are for models tested at 115/1/60.

Performance certified is for installation type A: Free Inlet, Free Outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for Installation Type A: free inlet hemispherical sone levels. Performance ratings include the effects of screen in the airstream. For models shown on this page, the AMCA Certified Ratings Seal applies to air and sound.

Performance certified is for installation type A: Free Inlet, Free Outlet. Power rating (BHP) does not include transmission losses. Selection software automatically calculates transmission losses when selecting equipment. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: free inlet hemispherical sone levels. Performance ratings include the effects of screen in the airstream.

Performance certified is for installation type A: Free Inlet, Free Outlet. Power rating (BHP) does not include transmission losses. Selection software automatically calculates transmission losses when selecting equipment. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: free inlet hemispherical sone levels. Performance ratings include the effects of screen in the airstream.

Performance certified is for installation type A: Free Inlet, Free Outlet. Power rating (BHP) does not include transmission losses. Selection software automatically calculates transmission losses when selecting equipment. The sound ratings shown are for loudness values in fan sonas at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: free inlet hemispherical sone levels. Performance ratings include the effects of screen in the airstream.

PENNBARRY PRODUCT SOLUTIONS

Commercial

- Roof & wall exhaust centrifugal fans
- Ceiling, wall, & inline centrifugal fans
- Roof supply centrifugal fans
- Square & round centrifugal fans
- Wall mounted axial fans
- Hooded roof axial fans
- Upblast roof axial fans
- Gravity ventilators
- Roof curbs

Industrial

- Freestanding centrifugal fans
- Industrial & material handling fans
- Tubular centrifugal inline fans
- Mixed flow centrifugal fans
- Plug & plenum fans
- Wall mounted propeller fans
- Tube axial fans
- Vane axial fans
- Bifurcator fans
- Lab exhaust

Kitchen ventilation

- Make-up air units
- Exhaust fans

Energy recovery

- Outdoor units
- Indoor units

PennBarry is proud to be your preferred manufacturer of commercial and industrial fans and blowers. Learn how PennBarry can assist you in your next application by contacting your PennBarry Representative or visiting us on the web at www.pennbarry.com
