ACL845AF STATIONARY ACOUSTICAL LOUVER
FORMED STEEL

STANDARD CONSTRUCTION

FRAME
8" (203) deep. 16 gage (1.6) galvanized steel channel.

BLADES
18 gage (1.3) airfoil shaped galvanized steel exterior surface, with 22 gage (.9) perforated steel interior surface that covers insulation. Blades positioned at 45° angle and spaced approximately 8" (203) center to center.

ACOUSTICAL INSULATION
Ruskatherm blanket.

SCREEN
1/2" mesh x 19 gage (13 x 1.1) galvanized bird screen in removable frame. Screen adds approximately 1/4" (13) to louver depth.

FINISH
Mill.

MINIMUM SIZE
12"w x 18"h (305 x 457).

APPROXIMATE SHIPPING WEIGHT
8 lbs. per sq. ft.

MAXIMUM FACTORY ASSEMBLY SIZE
Shall be 64 sq. ft. (6m²). Maximum single section size shall be 48" x 96" (1219 x 2438). Louvers larger than the maximum single section size will require field assembly of smaller sections.

FEATURES

The ACL845AF offers insulated airfoil blades which provide effective sound attenuation and weather protection with an architecturally pleasing appearance.

VARIATIONS
Variations to the basic design of this louver are available at additional cost. They include:

- Extended sill.
- Front or rear security bars.
- Filter racks.
- A variety of bird and insect screens.
- Selection of finishes: baked enamel (modified fluoropolymer), epoxy, Kynar, Pearldize, prime coat, integral color and clear anodize. (Some variation in anodize color consistency is possible. Anodize finish available only on aluminum construction.)
- Formed aluminum frame with .100" (2.5) nominal wall thickness and .080" (2) blade with .040" (1) perforated aluminum interior surface.

ALL STATED SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE OR OBLIGATION. © Ruskin February 2013
Furnish and install louvers as hereinafter specified where shown on plans or as described in schedules. Louvers shall be stationary airfoil acoustical type contained within an 8\" (203) frame. Louver components (heads, jambs, sills, blades, and mullions) shall be factory assembled by the louver manufacturer. Louver sizes too large for shipping shall be built up by the contractor from factory assembled louver sections to provide overall sizes required. Louver design shall incorporate structural supports required to withstand a windload of 20 lbs. per sq. ft. (.96kPa) (equivalent of a 90 mph wind [145 KPH] - specifier may substitute any loading required).

Louvers shall be Ruskin Model ACL845AF construction as follows:
Frame: 16 gage (1.6) galvanized steel channel.
Blades: 20 gage (1.0) airfoil shaped galvanized steel exterior surface, 22 gage (.9) perforated steel interior surface that covers insulation. Blade angle 45\° on 8\" (203) centers.
Screen: 1/2\" mesh x 19 gage (13 x 1.1) galvanized steel in removable frame.
Finish: Select finish specification from Ruskin/Valspar Finishes Brochure.

Published louver performance data bearing the AMCA Certified Ratings Seal for Air Performance must be submitted for approval prior to fabrication and must demonstrate pressure drop equal to or less than the Ruskin model specified.

PERFORMANCE DATA

AMCA Standard 500 provides a reasonable basis for testing and rating louvers. Testing to AMCA 500 is performed under a certain set of laboratory conditions. This does not guarantee that other conditions will not occur in the actual environment where louvers must operate.

The louver system should be designed with a reasonable safety factor for louver performance. To ensure protection from water carryover, design with a performance level somewhat below maximum desired pressure drop and .01 oz./sq. ft. of water penetration.

WATER PENETRATION

Test size 48\" wide x 48\" high (1219 x 1219)
Beginning point of water penetration at .01 oz./sq. ft. lies above
841 fpm (256 m/min) through the Free Area of the ACL845AF louver.

Free Area Velocity in feet and (meters) per minute
Standard air .075 lb/ft²
## Free Area Guide

FREE AREA GUIDE shows free area in ft² and m² for various sizes of ACL845AF

### PRESSURE DROP

Ratings do not include the effect of a bird screen.

- **Static Pressure Drop in Inches w.g. and (Pa)**
  - 100 (254)
  - 200 (508)
  - 300 (762)
  - 400 (1016)
  - 500 (1270)
  - 600 (1524)
  - 700 (1778)
  - 800 (2032)
  - 900 (2286)
  - 1000 (2540)

- **Air Velocity in feet and (meters) per minute through Free Area**
  - (Data corrected to standard air density and AMCA figure or figures tested to 5.5)
## TYPICAL INSTALLATION DETAILS

### Masonry Wall
- CMU
- Louver
- Extended Sill

### Metal Panel Wall
- Corrugated Metal
- Drip Cap
- Insulation
- Louver
- Extended Sill

### Wood Installation
- 2 x 4 Wood Blocking
- Louver
- Sheathing
- Siding

*Accessories at additional cost.*
