EAD-635 is an adjustable louver designed to protect air intake and exhaust openings in building exterior walls that require tight air shut off. Design incorporates a drainable head member and adjustable drainable blades to channel water to the jambs which guides the water through vertical downspouts for escape at the sill. The EAD-635 is an extremely efficient louver with AMCA LICENSED PERFORMANCE DATA enabling designers to select and apply with confidence.

### Standard Construction

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frame</td>
<td>Heavy gauge extruded 6063-T5 aluminum, 6 in. x 0.125 in. nominal wall thickness</td>
</tr>
<tr>
<td>Blades</td>
<td>Drainable design, heavy gauge extruded 6063-T5 aluminum, 0.081 in. nominal wall thickness, positioned at 35º angles on approximately 4.5 in. centers</td>
</tr>
<tr>
<td>Seals</td>
<td>Dual-durometer extruded vinyl blade seals, Compressible stainless steel jamb seals</td>

</tbody>
</table>

**Temperature Restrictions**

-20°F - +180°F

**Linkage**

Side linkage, out of airstream (concealed in frame)

**Bearings**

Synthetic sleeve type

**Axles**

½ in. dia. zinc plated steel

**Construction**

Mechanically fastened

**Birdscreen**

3/4 in. x 0.051 in. flattened expanded aluminum in removable frame, inside mount (rear)

**Finish**

Mill

**Minimum Size**

12 in. W x 12 in. H

**Maximum Single Section Size**

60 in. W x 96 in. H

**Options (at additional cost)**

- A variety of bird and insect screens
- A variety of electric, pneumatic or manual actuators
- Clip angles
- Extended sill
- Filter rack
- Flanged frame
- Glazing adaptor
- Security bars
- A variety of architectural finishes including:
  - Clear anodize
  - Integral color anodize
  - Baked enamel paint
  - Kynar paint

*Width and height dimensions furnished approximately ¼ inch under size.*
**Free Area Chart (Sq. ft.)**

Greenheck Fan Corporation certifies that the EAD-635 louvers shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program.

### Airflow Resistance

(Standard Air - .075 lb/ft³)

Model EAD-635 resistance to airflow (pressure drop) varies depending on louver application (air intake or air exhaust). Free area velocities (shown) are higher than average velocity through the overall louver size. See louver selection information.

### Water Penetration

(Standard Air - .075 lb/ft³)

Test size 48 in. x 48 in. Test duration of 15 min.

The AMCA Water Penetration Test provides a method for comparing various louver models and designs as to their efficiency in resisting the penetration of rainfall under specific laboratory test conditions. The beginning point of water penetration is defined as that velocity where the water penetration curve projects through .01 oz. of water (penetration) per sq. ft. of louver free area.

*The beginning point of water penetration for Model EAD-635 is 1107 fpm free area velocity.*

These performance ratings do not guarantee a louver to be weather-proof or stormproof and should be used in combination with other factors including good engineering judgement in selecting louvers.
Maximum single section size for model EAD-635 is 60 in. W x 96 in. H. Larger openings require field assembly of multiple louver sections to make up the overall opening size. Individual louver sections are designed to withstand a 25 PSF wind load (please consult Greenheck if the louvers must withstand higher wind-loads). Structural reinforcing members may be required to adequately support and install multiple louver sections within a large opening. Structural reinforcing members along with any associated installation hardware is not provided by Greenheck unless indicated otherwise by Greenheck. Options and accessories including, but not limited to, screens, filter racks, louver doors, and blank off panels are not subject to structural analysis unless indicated otherwise by Greenheck. Additional information on louver installation may be found in AMCA Publication #501, Louver Application Manual.

Minimum Single Section Size
12 in. W x 12 in. H

Maximum Single Section Size
60 in. W x 96 in. H

Adjustable Louver Drainable Blade
Extruded Aluminum

Adjustable Louver Drainable Blade

- **Connector Link**
- **Steel Linkage Tie-Bar (Enclosed in Jamb Frame)**
- **0.081" (2.05mm) Extruded Aluminum Blades**
- **Optional Blade Seal**
- **Optional Bird or Insect Screen**

- **Actuator Clearance Width (Varies by Actuator Type)**
- **Minimum 7" (177.8mm)**
- **Rear Aluminum Blank-off**
- **Bottom Aluminum Blade Stop**
- **0.125" (3.2mm) Extruded Aluminum Sill**

- **Non-compressible Dead Load Shim, Sealant, and Backer Rod Not by Greenheck**

- **0.375" (9.5mm) Steel Blade Axle Pin (Typ. Both Ends)**
- **0.875" O.D. (15.9mm) x 0.375" I.D. Plastic Bushing (Typical Both Ends)**
- **0.125" (3.2mm) Extruded Aluminum Jamb**

- **Sealant and Backer Rod Not by Greenheck**

- **10 x 1" #8 SS Tek Screw 16" O.C. Field Drilled and Installed (Not by Greenheck)**

- **Nominal Width**
- **Actual Louver Width**

- **SEALANT AND BACKER ROD NOT BY GREENHECK**

- **Provide intermittent weeps to allow for drainage. Sealant and backer rod not by Greenheck.**

- **Optional Extruded Flange**

- **Optional Extruded Sill**

- **Greenheck**
### FINISHES

<table>
<thead>
<tr>
<th>Finish Type</th>
<th>Description/Application</th>
<th>Color Selection</th>
<th>Standard Warranty (Aluminum)</th>
</tr>
</thead>
<tbody>
<tr>
<td>AAMA 2605</td>
<td>“Best.” The premier finish for extruded aluminum. Tough, long-lasting coating has superior color retention and abrasive properties. Resists chalking, fading, chemical abrasion and weathering.</td>
<td>Standard Colors: Any of the 27 standard colors shown can be furnished in 70% or 50% Kynar®; 100% Fluoropolymer or Baked Enamel.</td>
<td>10 Years (20 Years Optional)</td>
</tr>
<tr>
<td>AAMA 2604</td>
<td>“Better.” Tough, long-lasting coating has excellent color retention and abrasive properties. Resists chalking, fading, chemical abrasion and weathering.</td>
<td>Mica Colors: Greenheck offers 6 standard Mica colors for 70% Kynar® or 100% Fluoropolymer.</td>
<td>5 Years</td>
</tr>
<tr>
<td>AAMA 2603</td>
<td>“Good.” Provides good adhesion and resistance to weathering, corrosion and chemical stain.</td>
<td>Custom Colors: Custom color matching is available. Consult your Greenheck representative for cost and/or lead-time implications if a custom color is required.</td>
<td>1 Year</td>
</tr>
<tr>
<td>AA-M10C22A42</td>
<td>“Two-step” anodizing is produced by following the normal anodizing step with a second, colorfast process.</td>
