APPLICATION

Ruskin FSD60-2 Series ultra low leakage combination fire and smoke dampers provide point-of-origin fire and smoke containment. The FSD60-2 includes high strength one-piece airfoil blades to ensure the lowest resistance to airflow and leakage up to 4000 fpm (20.3 m/s) and 8 in. wg (2 kPa).

Ruskin FSD60LP-2 ultra low leakage, low profile, and low pressure drop combination fire and smoke damper is provided with an integral sleeve/frame design. The FSD60LP-2 has the lowest pressure drop of less than .03 at 1000 FPM (5.1 m/s) of any fire smoke damper.

All FSD60-2 series dampers may be installed vertically in walls or horizontally in masonry floors and are rated for airflow and leakage in either direction.

DAMPER SIZES

Sizes indicated below are for ratings of 2000 FPM (10.2 m/s) and 4 in. w.g. (1 kPa).

MINIMUM SIZE

FSD60LP-2 - 6"w x 6"h (152 x 152) (actual size)
FSD60-2 - 8"w x 6"h (203 x 152)

MAXIMUM SIZE

FSD60LP-2
- Single Section Vertical or Horizontal – 36"w x 14"h (914 x 356)
- Single Section Vertical – 32"w x 48"h (813 x 1219)
- Single Section Horizontal – 30"w x 48"h (762 x 1219)
FSD60-2
- Multiple Section Vertical
  - 120"w x 96"h (3048 x 2438)
  - Multiple Section Horizontal
  - Electric Actuator – 120"w x 96"h (3048 x 2438)
  - Pneumatic Actuators – 144"w x 96"h (3658 x 2438)

CONTROLLED CLOSURE DEVICE (HEAT-ACTUATED)

EFL (Electric Fuse Link) - 165°F (74°C) standard. 212°F (100°C), 250°F (121°C), 350°F (177°C) available.
PFL (Pneumatic Fuse Link) - 165°F (74°C) standard. 212°F (100°C), 285°F (141°C) available.

OPTIONS

- FM Approvals as Specification Tested Product.
- DTS (Damper Test Switch) test switch for cycle testing.
- TS150 for reopenable operation in dynamic smoke management systems.
- DSDF/DSDN Duct Smoke Detector (Flow rated or No-Flow). FSD60-2 only.
- SP100 Switch Package to allow remote indication of damper blade position.
- MCP control panels for testing or monitoring purposes or smoke management systems.
- Factory Sleeves of various lengths and gauges to ensure field compliance with UL installation requirements. FSD60-2 only.
- FAST Angle factory supplied for labor saving angle one-side installation. Other angles of various sizes and gauges also available for one-side or two-side installation.
- Stainless Steel Linkage – 304 stainless steel.

UL CLASSIFIED

UL555S Listing R5531

NOTES

1. Dampers are furnished approximately 1/4" (6) smaller than given opening dimensions.
2. Dimensions shown in parentheses ( ) indicate millimeters.
Ruskin Company certifies that the FSD60-2 and FSD60LP-2 shown hereon is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to air performance for the FSD60-2.

To determine the AMCA Licensed air performance:

Locate the applicable feet per minute face velocity on the bottom of the velocity vs. pressure drop chart below. Move up the chart to the most appropriate size damper line. From the intersection point, move left to determine the pressure drop on the left side of the chart.

For other damper sizes refer to Air Performance Data For All Fire and Smoke Dampers spec sheet.
EXTENDED OPERATIONAL RATINGS (FSD60-2 ONLY)

UL555S Test Standards require all fire and smoke dampers to prove closure and operation against heated air flow. The minimum ratings are 2,000 fpm (10.2 m/s) and 4\(^\circ\) w.g. (1 kPa) and minimum of 250° (121°C).

**Safety Factor** - UL555S has a built in safety factor of 400 fpm (2.03 m/s) and 0.5\(^\circ\) w.g. (0.12 kPa). For example, to achieve a dynamic closure rating of 2,000 fpm and 4\(^\circ\) wg the damper must operate against an actual airflow rate of at least 2,400 fpm (12 m/s) and pressure of at least 4.5\(^\circ\) w.g. (1.12 kPa).

All Ruskin fire smoke dampers meet or exceed the minimum UL555S requirements. In addition, Ruskin's FSD60-2 damper exceeds these minimum requirements in many cases. See the chart below for minimum and extended UL555S listings for the FSD60 dampers.

### ACTUATOR REQUIREMENTS

* UL555S requires that all fire smoke dampers have factory mounted actuators in order to bear the UL label.
* Fire smoke dampers larger than single section may require multiple actuators. See “Fire Smoke Damper Multiple Section Detail” spec sheet for details.
* Ruskin’s fire smoke dampers are UL555S labeled with either electric or pneumatic actuators mounted internal (in air stream) or external (out of air stream).
* Fire smoke dampers utilizing multiple actuators must have all actuators **field** wired to a common point for simultaneous closure. All field wiring shall be in accordance with applicable codes, ordinances and regulations.

### FSD60LP-2 SLEEVE DIMENSIONAL DATA

The drawing shows the standard position of the FSD60LP-2 when installed. The mounting location provides enough space for the actuators, controls (FAST) retaining angles and duct connections. The minimum sleeve length is 20" (508). Consult Ruskin for shorter sleeve lengths.

**NOTES**

1. The entire frame is not required to be installed within the wall or floor. The center line of the closed blade, should be contained within the wall or floor.
2. See basic UL installation instructions for complete installation requirements.
The 'L' dimension is the distance from the end of the sleeve to the damper. The standard damper location in the sleeve provides enough space for the actuator, controls, mounting angles and duct connection. The standard sleeve length for FSD's is 20” (508) long and the standard 'L' dimension is 10 1/4" (270). The standard 'L' dimension allows the end of the sleeve to be a minimum of 10 1/2" (270) to the wall/floor and up to a maximum of 12 1/2" (318) to the wall/floor.

"The EFL, PFL, SP100 or TS150 location may be located above, below or on the side of the actuator depending upon the damper's height.

Optional 17" (432) long sleeve length available. Due to space limitations for actuators and controls with 17" (432) long sleeves, the damper height ('B' dimension) is restricted to the dimensions shown in the chart below. Consult Ruskin for other sleeve lengths.

### FSD60-2 INTERNAL MOUNT ACTUATOR DIMENSION

Ruskin model FSD60-2 has been tested for internal mount actuators and accessories. These applications may be preferred where space is limited on the outside of the damper. Internally mounted actuators do not require the damper to have a factory installed sleeve or side plate.

(Model FSD60LP-2 not available with internal mount actuators)
FSD60-2 Series dampers may be supplied with Round, Oval and Rectangular duct connections.

**Style**
- **B**: Units Under 6" Tall
- **R**: Round Non-Sealed (Low Pressure)
- **CR**: Round Sealed (Medium Pressure)
- **WR**: Round Welded (High Pressure)
- **C**: Rectangular Sealed (Low and Medium Pressure)
- **WC**: Rectangular Welded (High Pressure)
- **LO**: Oval Non-Sealed (Low Pressure)
- **CO**: Oval Sealed (Medium Pressure)
- **WO**: Oval Welded (High Pressure)

The square damper size will be 2" (51) larger in width and height than the round, oval or rectangular duct size ordered.

**DUCT TRANSITION CONNECTIONS**

**MINIMUM and MAXIMUM SIZES**

**Round Transitions**
- Minimum 4" (102) diameter
- Maximum 94" (2388) diameter

**Rectangular and Oval Transitions**
- Minimum 6"w x 4"h (152 x 102)
- Maximum 118"w x 94"h (2997 x 2388) in diameter

**B' Style Transitions**
- Minimum height 4" (102) "B'" style transitions are utilized on units where the damper height is less than 6" (152).

Consult Ruskin for other available styles and sizes.

**Note:** For low and medium pressure units (Styles R, CR, C and CO) the collar extends 1 1/2" (38) beyond the sleeve length and for low pressure and high pressure units (Styles R, WR, WC and WO) the collar extends 2 1/2" (64) beyond the sleeve length.

Approximate damper assembly weight: 17 lbs. per sq. ft. for Style A
Combination fire smoke dampers meeting or exceeding the following specifications shall be furnished and installed at locations shown on plans or as described in schedules. Combination fire smoke dampers shall be produced in an ISO 9001 certified factory and shall be warranted to be free from defects in material and workmanship for a period of 5 years after date of shipment. Dampers shall meet the requirements of NFPA80, 90A, 92A, 92B, 101 and 105 and shall have a fire rating of 1 1/2 hours in accordance with the latest edition of UL555 and shall be classified as Leakage Class 2 Smoke Dampers in accordance with the latest version of UL555S. Dampers shall be AMCA Licensed and the product literature shall bear the AMCA certified rating seal for air performance. AMCA certified testing shall verify pressure drop does not exceed .03" w.g. at a face velocity of 1000 fpm on a 12" x 12" (305 x 305) damper.

Damper frame (when size permits) shall be constructed using the UniFrame Design Concept (UDC) and shall be minimum 16 gauge (.16) galvanized steel formed into a structural hat channel superior to 13 gauge (.24) channel frame. Assemblies less than 36" (914) wide x 14" (356) high shall be Low Profile (LP) design to maximize the free area of these smaller dampers. LP frame and blade shall be 20 gauge (.010) and shall include an integral sleeve. Damper blades shall be single piece airfoil shaped with 14 (.20) gauge equivalent strength and units less than 36" (914) wide x 14" (356) high low profile aerodynamic shaped, double skin 16 (.16) and 20 (.10) gauge galvanized steel. Blade edge seals shall be inflatable silicone mechanically locked into blade edge and units less than 36" (914) wide x 14" (356) high stainless steel, flexible metal compression type. Bearings shall be stainless steel, permanently lubricated sleeve type turning in an extruded hole in the frame for maximum life.

Combination fire smoke dampers and their actuators shall be qualified in accordance with UL555S to an elevated temperature of 250°F (121°C) or 350°F (177°C) depending upon the actuator. Appropriate electric or pneumatic actuators (specifier select one) shall be installed by the damper manufacturer at time of damper fabrication. Electric actuators, factory installed on dampers, shall have been tested for prolonged periods of holding (minimum 1 year) with no evidence of reduced spring return performance. Each damper shall be rated for leakage and airflow in either direction through the damper. In addition to the leakage ratings already specified, the dampers shall be AMCA licensed for Air Performance.

Optional FM Approvals Specification

Each combination fire smoke damper shall be listed in Factory Mutual (FM) approvals Specification Tested Product and labeled accordingly.

Combination fire smoke dampers shall be Ruskin FSD60-2 Series and units less than 36" (914) wide x 14" (356) high model FSD60-2LP.

(Consult www.ruskin.com for electronic version of this “Quick” spec as well as for complete 3-part CSI MasterFormat Specifications)
