TDD Series
DIRECT DRIVE VANE AXIAL FAN
**Direct Drive Vane Axial Fan – TDD Series**

**Feature**
For commercial and industrial application where large volume of air is required at moderate to high pressure. Volume coefficient ranged from 0.3 to 0.6 and pressure coefficient ranged from 0.2 to 0.6. Specially designed integral straightening vanes reduce turbulence and provide high efficiency and low sound level.

**Construction**
Double flanged casing is produced in mild steel or galvanized steel. The impeller blades are made of Aluminum Alloy.

**Finish**
Zinc rich primer and polyester powder coating or galvanized finishing are available for all mild steel parts.

**Operating Temperature**
Normal Ventilation : -20°C to +55°C
High Temperature Application : available up to 400°C/2Hrs.

**Motors**
Totally Enclosed Class 'F' or 'H', with a min. IP55 protection are fitted as standard. Motors 3.0kW and above are star/delta starting. Motor of other specification are available upon request.

**Airflow Direction**
Air flow from impeller to motor is fitted as standard. Air flow from motor to impeller can be supplied upon request.
