TRC Series
DIRECT DRIVE REVERSIBLE
VANE AXIAL FAN
Direct Drive Reversible Vane Axial Fan – TRC Series

Feature
For commercial and industrial application where large volume of air is required at moderate to high pressure in both directions (reversible flow). Volume coefficient ranged from 0.2 to 0.8 and pressure coefficient ranged from 0.2 to 0.4.

Construction
Double flanged casing is produced in mild steel or galvanized steel. The reversible impeller blades are made of Aluminum Alloy.

Finish
Zinc rich primer and polyester powder coating or galvanized finishing are available for all mild steel parts.

Operating Temperature
Normal Ventilation: -20°C to +55°C
High Temperature Application: available up to 400°C/2Hrs.

Motors
Totally Enclosed Class ‘F’ or ‘H’, with a min. IP55 protection are fitted as standard. Motors 3.0kW and above are star/delta starting. Motor of other specification are available upon request.

Truly Reversible
Reversibility of 95~100% air flow from impeller to motor is fitted as standard. Air flow from motor to impeller can be supplied upon request.
