Standard Construction and Materials

**FRAME:** 5½” x ¼” x 16 GA. galvanized steel hat channel. Flat head and sill for maximum free area on dampers less than or equal to 13” high.

**BLADES:** 20 GA. galvanized steel, double skinned (equal to 14 GA.), parallel action

**AXLES:** Plated solid steel stub.

**BEARINGS:** Oil impregnated bronze.

**LINKAGE:** Plated steel angle and crank plates with stainless steel pivots, in-jamb type.

**STOPS:** 18 GA. galvanized steel angles at head and sill

**BLADE SEALS:** Silicone.

**JAMB SEALS:** Stainless steel.

**SLEEVE:** Minimum 20 GA. galvanized steel by 18” long.

**CAULKING:** Hardcast Irongrip 601 or UL-listed equivalent.

**ACTUATOR:** Electric with heat response device (EHRD) or pneumatic with heat response device (PHRD). Factory-installed for power-open/spring-close (fail close) operation. External left hand mounted as viewed from jackshaft side of damper.

**FINISH:** Mill or galvanized steel.

Options

Exact size (no undercut)

Actuators - 120V, 24V, 230V or pneumatic

Right hand and/or internal actuator mounting locations (restrictions apply)

Dual Position Indication (DPI) switches

Sensotherm Re-Openable Heat Response Device (ESOT) for electric actuators

Sensotherm Re-Openable Heat Response Device (PSOT) for pneumatic actuators

Model SM-501 flow-rated smoke detector

Model 2151 no-flow smoke detector (12” minimum damper height)

Momentary test switch

Remote test box

Transformers

Tab-lock retaining angles

Stainless steel bearings

Stainless steel axles

Security bars

Copper tubing (for pneumatic actuators)

Sleeves of various depths and gauge thicknesses (restriction apply)

No sleeves (restriction apply)

Round or oval transitions

Short-width (less than 8”) and/or short-height (less than 6”) transitions

Notes

1. Nominal deductions will be made to the opening size given.

2. Dampers greater than or equal to 12” in height with factory mounted SM-501 smoke detectors require a minimum 19” deep sleeve (10¾” on the actuator side). Detectors will be mounted on the side of the damper opposite actuator.

3. Dampers less than 12” in height with factory mounted SM-501 smoke detectors require a minimum 20 deep sleeve (11½” on the actuator side). Detectors will be mounted on the bottom or top of damper.

4. Smoke detectors can be ordered for field mounting with standard 18” deep sleeve.

5. Dampers for horizontal installation can only be mounted in a fire barrier constructed of masonry/concrete materials.

Operational Ratings

Maximum Differential Pressure: 4 in. wg (6 in. wg for selected size/actuators combinations)
Maximum Velocity: 2000 fpm (4000 fpm for selected size/actuator combinations)

Leakage Ratings

UL Leakage Class I
10 cfm per sq. ft. maximum @ 1 in. wg
20 cfm per sq. ft. maximum @ 4 in. wg
24.5 cfm per sq. ft. maximum @ 6 in. wg

Pressure Drop Ratings

The Pressure drop data shown below is based on laboratory conditions. The test setup does not take into account elbows or other duct fittings that are part of every actual duct system. The configuration of the actual duct system immediately upstream and downstream of the damper often contributes more pressure loss than the damper itself.

Cesco Products certifies that the CA2 damper shown here is licensed to bear the AMA Seal. The ratings shown are based on tests and procedures performed in accordance with AMA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to the Air Performance Ratings only.

### NOTES

1. For dampers with no transition, the size to order will be frame size, which is equal to the size of the ductwork unless otherwise noted.
2. For dampers with transition, the size to order will be as follows: width + 2" by height + 2".
3. When the damper is 6" high, width is limited to 16". If the damper is ordered as 6" high and its width is less than 16", an 8" high damper with a 2" short-height transition will be supplied.
