Combination Fire/Smoke Damper • 1½ Hour Rated • Class II • 250°F or 350°F • Single Thickness Blades • Galvanized Steel

- Standard Construction and Materials
  
  **FRAME:** 20 GA. galvanized steel flat by 18" long integral sleeve.
  
  **BLADES:** 16 GA. galvanized steel single thickness, parallel action.
  
  **AXLES:** Plated solid steel stub.
  
  **BEARINGS:** Oil impregnated bronze.
  
  **LINKAGE:** Galvanized steel angle interconnect, with plated steel brackets and pivots located on blade.
  
  **STOPS:** 18 GA. galvanized steel at head and sill.
  
  **BLADE SEALS:** Silicone.
  
  **JAMB SEALS:** Stainless steel.
  
  **SLEEVE:** Integral 20 GA. galvanized steel by 18" long.
  
  **RETAILING ANGLES:** ¾" x ⅛" x 16 GA. adjustable perimeter mounting angle.
  
  **CAULKING:** Hardcast Irongrip 601 or UL-listed equivalent.
  
  **FINISH:** Mill on galvanized steel.
  
  **ACTUATOR:** Electric with heat response device (EHRD) or pneumatic with heat response device (PHRD). Factory-installed for power-open/spring-close (fail close) operation. External left-hand mounted as viewed from jackshaft side of damper.

- Options
  
  Integral Dual Position Indication (IDPI) switches
  
  Sensotherm re-openable heat response device (ESOT) for electric actuator
  
  Sensotherm re-openable heat response device (PSOT) for pneumatic actuator
  
  Model SM-501 Flow-rated smoke detector ship loose
  
  Model SM-501 Flow-rated smoke detector mounted and wired (6" minimum damper height with a 20" sleeve - extra 2" on jackshaft side)

  Tab-Lock retaining angles
  
  Stainless steel bearings
  
  Copper tubing (for pneumatic actuators)

  Optional 19" or 20" sleeve depth - Additional sleeve length is added to non-jackshaft side unless ordered with mounted smoke detector and/or less than 6"H with B-Pan Transition

  Round or oval transitions

  Short-width (less than 6") and/or short-height (less than 6") transitions

- Notes
  
  1. “A” width and “B” height are opening dimensions. Damper frames are provided approximately ¼” undersized.
  
  2. Dampers are available in 1” increments only.
  
  3. Dampers for horizontal installation can only be mounted in a fire barrier constructed of masonry/concrete materials.
  
  4. The blades must stay in the fire wall. The adjustable retaining angle may only be adjusted the distance shown on the label or installation instructions.

Pressure Drop Ratings
The pressure drop data shown below is based on laboratory conditions. The test setup does not take into account elbows or other duct fittings that are part of every actual duct system. The configuration of the actual duct system immediately upstream and downstream of the damper often contributes more pressure loss than the damper itself.

This damper tested in accordance with AMCA 500-D, Figure 5.3
Intake air converted to standard air density.

Cesco Products certifies that the model CR2 damper shown here is licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to Air Performance Ratings only.
