### OPTIONS
- Integral Dual Position Indication (IDPI) switches
- Model SM-501 Flow-rated smoke detector shipped loose
- Model SM-501 Flow-rated smoke detector mounted and wired (6" minimum damper height with a 20" sleeve - extra 2" on jackshaft side)
- Tab-lock retaining angles
- Stainless steel bearings
- Copper tubing (for pneumatic actuators)
- Optional 19" or 20" sleeve depth - Additional sleeve length is added to the non-jackshaft side unless ordered with mounted smoke detector and/or less than 6"H with B-Pan Transition
- Round or oval transitions
- Short-width (less than 16") and/or short-height (less than 6") transitions

### NOTES
1. "A" width and "B" height are opening dimensions. Damper frames are provided approximately ¼" undersized.
2. Dampers available in 1" increment only.

**PRESSURE DROP RATING**
The pressure drop data shown below is based on laboratory conditions. The test setup does not take into account elbows or other duct fittings that are part of every actual duct system. The configuration of the actual duct system immediately upstream and downstream of the damper often contributes more pressure loss than the damper itself.
