Standard Construction and Materials

**FRAME:** 5½" x ¾" x 16 GA. 304 stainless steel hat channel. A flat head and sill are used for sizes up to 13” high.

**BLADES:** 16 GA. galvanized steel single thickness, parallel action.

**AXLES:** 304 stainless steel stub.

**BEARINGS:** Stainless steel.

**LINKAGE:** 304 stainless steel angle and crank plates with stainless steel pivots, in-jamb type.

**STOPS:** 18 GA, 304 stainless steel at head and sill.

**BLADE SEALS:** Silicone.

**JAMB SEALS:** Stainless steel.

**SLEEVE:** Minimum 20 GA. 304 stainless steel by 18" long (sizes greater than 84" wide or 84" high require minimum 18 GA.)

**CAULKING:** Hardcast irongrip 601 or UL-listed equivalent.

**ACTUATOR:** Electric with heat response device (EHRD) or pneumatic with heat response device (PHRD). Factory-installed for Power-Open/Spring-Close (fail close) operation. External left hand mounted as viewed from jackshaft side of damper.

**FINISH:** Mill on 304 stainless steel.

Options

Type 316 Stainless Steel (where available)

External right hand actuator mounting location.

Integral Dual Position Indication (IDPI) switches.

Sensotherm re-openable heat response device (ESOT) for electric actuator.

Sensotherm re-openable heat response device (PSOT) for pneumatic actuator.

Model SM-501 Flow-rated smoke detector (10” minimum damper height)

Tab-Lock retaining angles.

Copper tubing (for pneumatic actuators)

Sleeves of various depths and gauge thicknesses.

Round or oval transitions.

Short-width (less than 16") and/or short-height (less than 8") transitions.

Notes

1. Damper frames are provided approximately ¼" undercut. The addition of a sleeve will increase the size of the assembly.
2. Damper with smoke detector must have a minimum sleeve of 19" (10½" on the actuator side and 3" on the non-actuator side).
3. Dampers for horizontal installation can only be mounted in a fire barrier constructed of masonry/concrete materials.
4. On dampers with all internal actuators, minimum height for factory mounted smoke detectors to be 14".

* Dampers smaller than the minimum frame size require a transition. Reference SD-TRFS for details.
Operational Rating

Maximum Differential Pressure: 4 in. w.g.
Maximum Face Velocity: 2000 FPM (3000 FPM for selected size/actuator combinations)

Leakage Rating

UL Leakage Class I
4 CFM per sq.ft. maximum @ 1 in. w.g.
8 CFM per sq.ft. maximum @ 4 in. w.g.

Sound Rating

The Noise Criterion data below was tested in accordance with ASTM E477.99 in the center octave band.

Pressure Drop Rating

The pressure drop data shown below is based on laboratory conditions. The test setup does not take into account elbows or other duct fittings that are part of every actual duct system. The configuration of the actual duct system immediately upstream and downstream of the damper often contributes more pressure loss than the damper itself.

Cesco Products certifies that the CG1(SS) damper shown here is licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to Air Performance Ratings only.
