Smoke Damper • Airfoil Blades • Leakage Class II • 250°F • Galvanized Steel • For Volume Control Applications

STANDARD CONSTRUCTION

FRAME: 5⅛ x ⅛ x 16 GA, galvanized steel hat channel. A flat head and sill are used for sizes up to 13” high.
BLADES: 20 GA, galvanized steel double skinned (equal to 14-GA), parallel action.
AXLES: Plated solid steel stub.
BEARINGS: Oil impregnated bronze.
LINKAGE: Plated steel angle and crank plates with stainless steel pivots, in-jamb type.
STOPS: 18 GA, galvanized steel at head and sill.
BLADE SEALS: Stainless steel.
JAMB SEALS: Stainless steel.
SLEEVE: Minimum 20 GA, galvanized steel by 18” long.
CAULKING: Hardcast Irongrip 601 or UL-listed equivalent.
FINISH: Mill on galvanized steel.
ACTUATOR: 24VAC/DC Electric: factory-installed for power-open/velocity & pressure

OPTIONS

Exact Size (no undercut)
Flange - Front, Rear or Both
Right Hand and/or Internal Actuator Mounting Locations (restrictions apply)
Dual Position Indication (IDPI) Switches
Model SM-501 Flow-Rated Smoke Detector
Model 2151 No-Flow Smoke Detector (12” minimum damper height)
Remote test box
Momentary test switch
Transformers
Tab-Lock retaining angles - 1 or 2 sets
Stainless steel bearings
Stainless steel axes
Security bars
Sleeves of various depths and gauge thickness (restrictions apply)
No sleeves or side plates only (restrictions apply)
Round or oval transitions
Short-width (less than 8”) and/or short-height (less than 6”) transitions

NOTES

1. Nominal deductions will be made to the opening size given.
2. Dampers greater than or equal to 12” in height with factory mounted SM-501 smoke detectors require a minimum 19” deep sleeve (10⅛” on the actuator side). Detectors will be mounted on the side of the damper opposite actuator.
3. Dampers less than 12” in height with factory mounted SM-501 smoke detectors require a minimum 20 deep sleeve (11½” on the actuator side). Detectors will be mounted on the bottom or top of damper.
4. Smoke detectors can be ordered for field mounting with standard 18” deep sleeve.
5. Actuator control signal is 2-10 VDC or with addition of 500 ohm resistor (by others) is 4-20 mA.

**OPERATIONAL RATING**
Maximum Differential Pressure: 4 in. w.g.
Maximum Velocity: 2000 fpm

**LEAKAGE RATING**
UL Class II
10 cfm per sq. ft. maximum @ 1 in. w.g.
20 cfm per sq. ft. maximum @ 4 in. w.g.

**PRESSURE DROP RATING**
The pressure drop data shown below is based on laboratory conditions. The test setup does not take into account elbows or other duct fittings that are part of every actual duct system. The configuration of the actual duct system immediately upstream and downstream of the damper often contributes more pressure loss than the damper itself.
