

INFINAIR FANS

IS IT RELIABLE? OF COURSE! WE ARE INFINAIR FANS, ARE YOU?

YFIAM

High Efficient Inline Vane Axial Fan
Impeller Type M

INFINAIR ARABIA COMPANY LTD. certifies the High Efficient Inline Vane Axial Fan (YFIAM) shown herein is licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA certified rating program. The AMCA certified ratings seal applies to the FEI for all models of YFIAM

High Pressure Axial Fans (Airfoil)
Sizes 315 mm - 1400 mm

Management Messages

INFINAIR ARABIA would like to express their thanks to all of you that you have selected INFINAIR products. INFINAIR products have been exported to many countries all over the world. INFINAIR is always looking to satisfy the customers in all levels by providing high quality fans. The fans engineering designs include a lot of solutions that maintain high performance, less power consumption, low noise and high efficiency rate. INFINAIR is very interested in Quality Management ISO 9001 and Health and Safety Management ISO 14001 and ISO 45001. We believe that management is the base to develop our products. INFINAIR has qualified engineers and designers to support customers before and after the orders. We have many training programs for the customers & consultants that enable them to get valuable information about Fans Engineering. INFINAIR has many departments to support their customers: Sales, Application, Engineering, Production, Quality and Service to make sure the products specifications are followed as per customers needs.

Certifications and Accreditation

INFINAIR ARABIA COMPANY LTD has considered the certifications and accreditation at first priority to make sure that customer will buy a safe product, high quality air performance and finishing. INFINAIR has done many steps toward success for help all kind of customers in Middle East and North Africa (MENA). All INFINAIR products are under warranty for 18 months of delivery date. If customer would join Warranty extended program for 2 years or 5 years that is also possible.

intertek
Total Quality Assured.

AUTHORIZATION TO MARK

This authorizes the application of the Certification Mark(s) shown below to the models described in the Product(s) Covered section when made in accordance with the conditions set forth in the Certification Agreement and Listing Report. This authorization also applies to multiple listed model(s) identified on the correction page of the Listing Report.

This document is the property of Intertek Testing Services and is not transferable. The certification mark(s) may be applied only at the location of the Party Authorized To Apply Mark.

>> Company Info

INFINAIR ARABIA COMPANY LTD is the first company in Kingdom of Jordan for producing ventilation industries specialized in fans production for HVAC objectives and Industrial purposes. It has been founded by the worldwide INFINAIR CORP that has been established in 2003. INFINAIR is a high technology brand. INFINAIR ARABIA is targeting to keep providing very high technology product, new solutions to the market, high energy saving fans, fast delivery to MENA, customer care, service after sales, new innovation ideas help customers to pay less cost with best solutions

Factory Address: Kingdom of Jordan, Amman, Mowaqqar Free Zone

Sales & Service Office:

INFINAIR ARABIA CO. LTD Sales offices are covering GCC and Africa:

- Jordan Sales Head Office and Technical Support - Amman
- Saudi Arabia, United Arab Emirate, Bahrain, Oman, Qatar and Iraq

Company Vision:

To be the most trusted brand in ventilation industry in the World

Company Mission:

To Provide reliable, convenient air movement controls, operations and services.

Awards and Achievements:

High-tech Enterprise

Renowned trademark:

INFINAIR™

Shanghai Famous Brand Product : INFINAIR FAN

SGS ISO 9001, ISO 14001 and ISO 45001 Management Certificates

Technological Strength of INFINAIR Brand:

Control Association (AMCA) accredited laboratory in our Head Quarter in PRC. Most of the INFINAIR products are tested and certified by many international certification bodies. The Strength of INFINAIR ARABIA comes from a strong JV with INFINAIR CORPORATION

INFINAIR Intelligent Ventilation Technology

- **Smart Needs Identification:**
It can dynamically adjust the operation target to the changing load and environment.
- **Intelligent Adjustment :**
The use of inverter or EC smart control technology can make the fans achieve best results under the control of the intelligent speed regulation system.
- **Intelligent Real-time Information:**
Individual workstations are linked to the central control system through internet or local area network
- **Intelligent Detection system:**
Reliable sensors can detect early symptoms and notify the user, ensuring stable operation.

INFINAIR Bionic Technology

- **INFINAIR's Bionic Energy Conservation**
We develop energy saving products by observing behaviors from the animal kingdom. How can birds fly thousands of miles with extremely low energy consumption?
- **INFINAIR Bionic Sound Reduction**
Why Owls can fly so silently? Even mice are not being able to detect their approach?
- The research and development of INFINAIR products are heavily inspired by the animal evolution over the past millenniums. We have learn how energy and sound are being able to conserve from their amazing changes .

INFINAIR's After-sales Service

- **Joint Research & Development**
The Joint R&D can provide customer the necessary support and guidance during the initial research progress
- **Customization**
Our products are fully customization. We are able to satisfy customer requirements on an individual basis
- **Adequate After-sales Service**

Green Smart Technology

- **CFD Simulation & Analysis**
A computer-aided air movement simulation model which can calculate the efficiency of the fan based on the number of blades, blade angle, width, and sound level.
- **Finite Element Analysis Technology**
To analyze and provide accurate prediction of how material is likely to respond when subjected to structural and/or thermal loads.

INFINAIR's Intelligent Fabrication

- Intelligent fabrication process
- Power test, dynamic balancing test and communication test performed on the production line
- Robotic welding technology
- Lean production
- 6Σ Systems

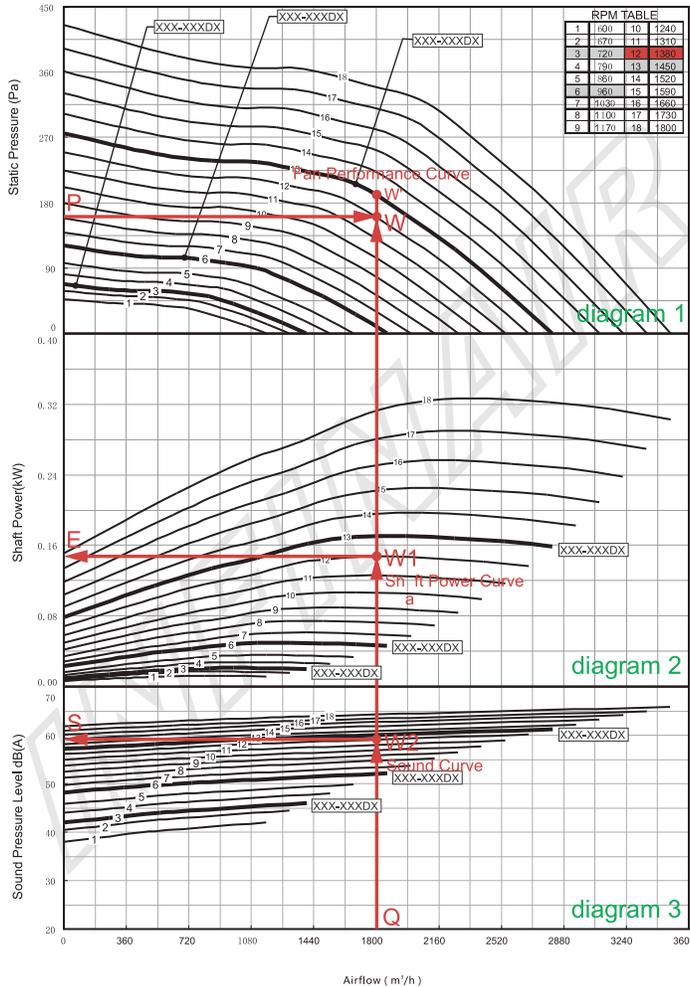

Connectivity

- Matrix Connection
- Central Connection
- Terminal Connection

Certifications and Tests

- **Most of the products are certified by:**
SMOKE, ATEX, AMCA
- **Performance and Reliability Tests:**
Airflow, Air Pressure, Power, Sound Level, Temperature Durability, Salt Spray and Water Proof Test, etc

Performance Curves - Technical

Example:

Airflow: 1,800m³/h, Static pressure: 160 Pa

Step One: A vertical line is drawn from the given airflow (Point Q: 1,800m³/h) and a horizontal line from the given static pressure (Point P: 160 Pa). The intersection point (Point W) is the operating point. Then find a performance curve closest to Point W (in this case, it is Static Pressure Curve 12 at RPM 1,380 as shown).

Step Two: From the intersection point (Point W) between the vertical line and Shaft Power Curve is drawn a horizontal line. Its intersection point with the Shaft Power axis (Point E: about 0.15 kW) represents the actual power consumption. So a 0.25 kW motor shall be used.

Step Three: From the intersection point (Point W2) between the vertical line and Sound Curve is drawn a horizontal line in Diagram 3. Its intersection point with the Sound Pressure Level axis (Point S: about 59 dB (A)) represents the sound level for the operating point of W.

Step Four: From the above steps, the model of the fan is identified as RTC-300-0.25 of belt drive type at 1,380 RPM. If fans of lower power or lower sound are preferred, please refer to larger fans for further comparison. It should be noted that the primary investments for larger fans would increase.

Step Five: If a fan of 1,800 m³/h at 180 Pa static pressure is needed, it is easy to know that Point W' is very close to Curve 13 in boldface (representing the fan of direct drive type at 1,450 RPM and 4-pole motor). The arrow leads to model RTC -300D4 equipped with a 0.25 kW motor, which has low price performance ratio.

Fan Law 1

Airflow delivered by a fan varies in direct proportion to the change in its rotational speed

$$CFM_2 = \frac{RPM_2}{RPM_1} \times CFM_1$$

Fan Law 2

Static Pressure developed by a fan varies with the square of the change in its rotational speed

$$SP_2 = \left(\frac{RPM_2}{RPM_1} \right)^2 \times SP_1$$

Fan Law 3

Power required by a fan varies with the cube of the change in its rotational speed

$$BHP_2 = \left(\frac{RPM_2}{RPM_1} \right)^3 \times BHP_1$$

Electrical Motors

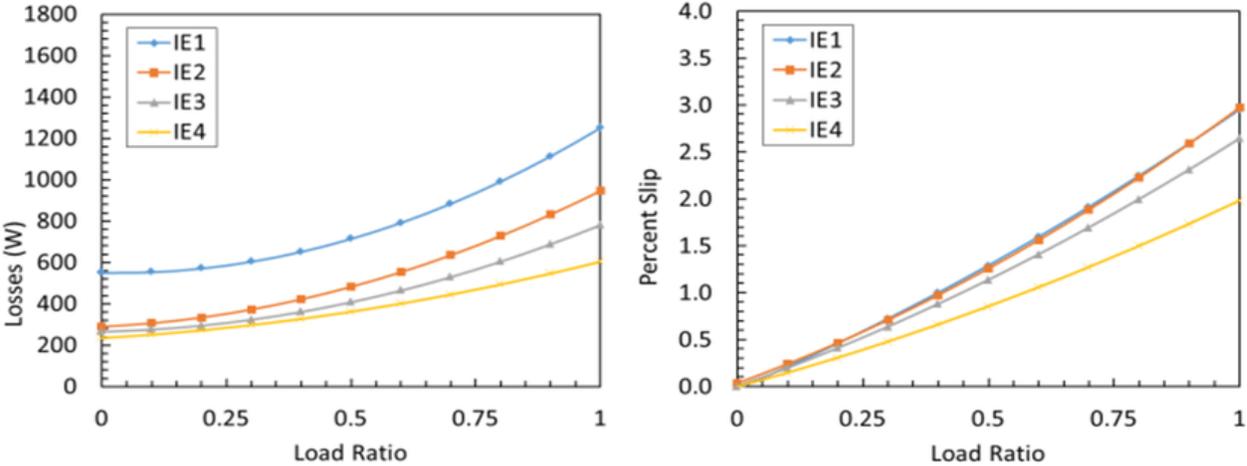

INFINAIR ARABIA fuse High Efficiency motors for all fans. TEFC motor's materials are made from Cast Iron, stainless steel shaft and high quality winding to overcome. The increasing demand for electrical energy to sustain global development requires consistent heavy investments in power supply generation. The best strategy to maintain energy supply in the short term is to avoid wastage and increase energy efficiency. Electric motors play a major role in this strategy, since around 40% of global energy demand is estimated to be related to electric motor applications. Consequently, any initiatives to increase energy efficiency, by using high efficiency electric motors and frequency inverters, are to be welcomed, as they can make a real contribution to reductions in global energy demand

Motors Features:

- High Ambient withstanding 55 degree C
- Premium Efficiency Rating IE3 is a standard
- Super Premium Efficiency Rating IE4 (Option)
- Cast Iron Body and well designed Terminal Box
- Insulation Class is F and Protection is IP55
- Applicable for VFD operation
- Thermal protection integration
- Smoke applications 300 C/ 400 C for 120 min (Option)
- Explosion Proof Motors (Options)
- NEMA 4X application for corrosion protection (Option)

Note:

Please consult the sales office or the agent nearby your area and ask for motor details. For R&D purposes and logistics, the motors brands, color and specifications are subject to change without prior notice.

>> Medium and High Pressure Axial Impellers with VANE-SOAR Series Airfoil Blades

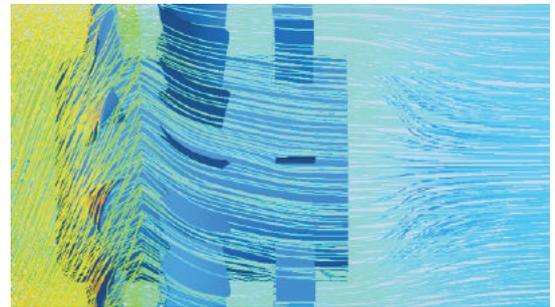

High-efficiency Air Performance

- Airfoil blades of optimum air performance
- Vortex hub
- Optimized design through CFD simulation and experimental verification
- Advanced process used to reduce clearance between the impeller and the cylindrical fan body
- High efficiency and lower operation costs

High Balance Quality Grade

- The balance quality grade as high as G2.5 (Just G6.3 for general products)
- Vibration reduced and reliability improved
- Sound greatly lowered

Unique Hub-to-tip Ratio

- Hub-to-tip ratio as high as 0.56
- High pressure rise rates to improve airflow movement
- Reduced airflow loss caused by insufficient pressure
- Particularly suitable for long distance airflow delivery in ducts

Reliable Structural Design

- Advanced casting process to ensure accuracy and consistency
- Optimized CAE aided design through repeated tests
- High-strength and more reliable vortex hub
- Innovative hub connection that makes operation safer

Variable Angles Available

- 14 impeller sizes in total ranging from 315 to 1400mm
- 8 blade angles in total from 0 to 35 degrees
- 4 speeds in total determined by four poles of 2/4/6/8
- Optimized model selection to help reduce upfront investment and operation costs

>> Product Features

High Efficiency and Dramatically Reduced Operation Costs

- Airfoil blades of optimum air performance
- Vortex hub that smooths the flow of air and reduces turbulence
- Advanced process used to reduce clearance between the impeller and the cylindrical fan body for greater efficiency
- Guide vanes mounted behind the impeller

Applications

- General air supply and exhaust
- Explosion proof air supply and exhaust
- Positive pressure air supply, smoke removal
- Two-speed air supply and exhaust

Great Reliability and Long Service Life Ready for Continuous Operation

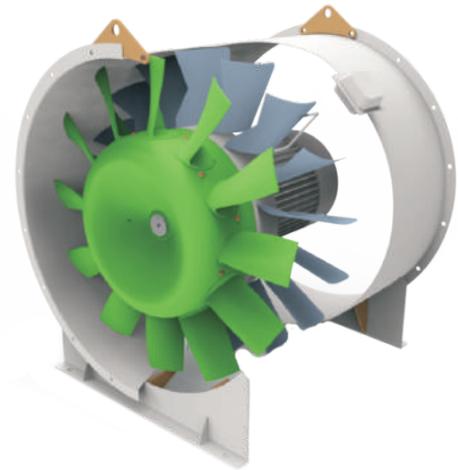

- Optimized design through the FEA method and experimental verification
- Casting process used for core components and high strength achieved
- Die formed for better accuracy and consistency
- Higher balance quality grade and more reliable operation

Direct Driven, Highly Efficient and Maintenance-free

- Airflow delivery of higher efficiency
- No quick wear parts and low maintenance
- Easier and more effective maintenance
- Sealed and lubrication-free motor bearing for longer service life
- Compact design that saves space

INFI-KOAT Modular Film™ Coating, Unfading Over Time

- Pickling, Parkerizing and alkaline wash combined to ensure a clean surface
- Powder adherence through electrostatic attraction to ensure a uniform coating
- Processed in the high temperature furnace for strong adhesion
- Resistant to ultraviolet radiation, moisture and marine climate
- Resistant to uniform corrosion over large areas and localized pitting corrosion

Optional Accessories

- **Flexible Connectors and Companion Flanges**

Flexible connectors and companion flanges are to be fitted at both the inlet and outlet for easy onsite installation.

- **Volume Control Damper**

The volume control damper, made of square galvanized steel, has electrical and manual actuators available.

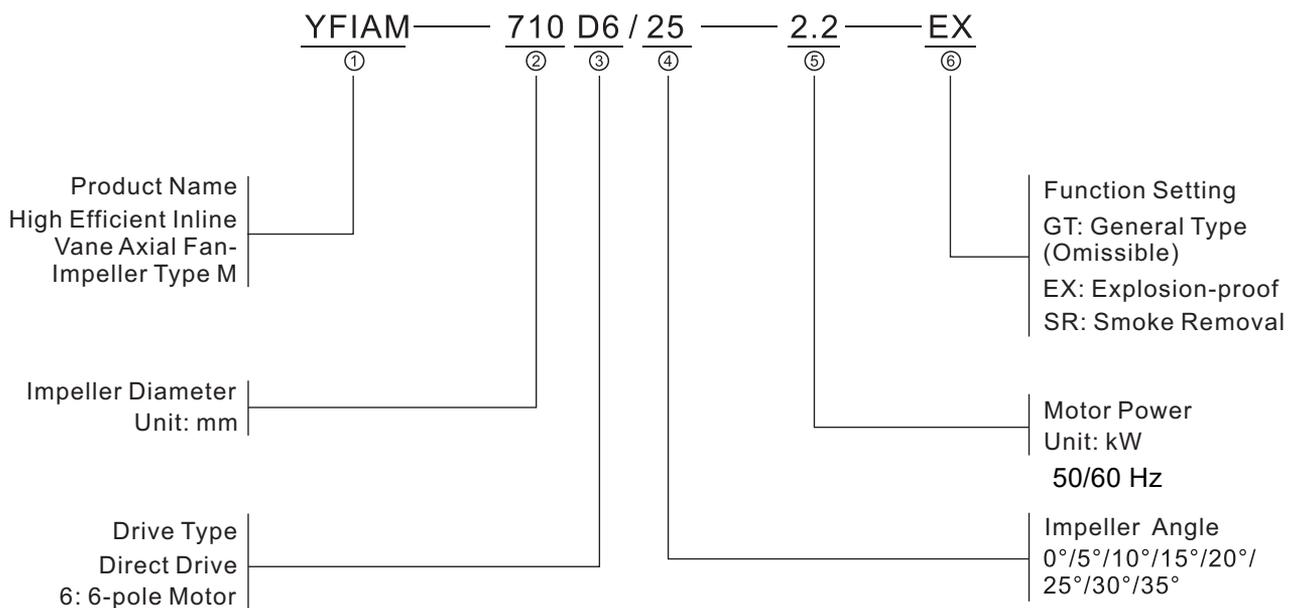

- **Vibration Isolators**

Vibration isolators can be ceiling hung or floor-mounted. Neoprene or spring isolators are available.

- **Silencer**

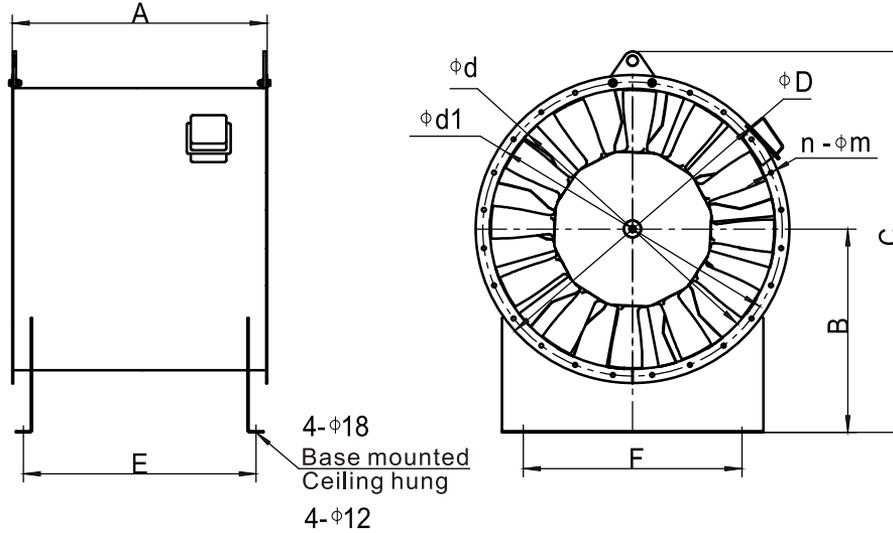

Silencers are made of galvanized steel and can be mounted at both the inlet and outlet. They can help dramatically reduce sound and improve efficiency.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts , calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Performance shown is for installation type B - free inlet, ducted outlet. Performance ratings do not include the effects of appurtenances(accessories). Values shown are for inlet LwiA sound power levels for Installation type B: free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² Watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA A-weighted sound pressure level is based on 11.5dB sound attenuation per octave band at 1.5m. dBA A-weighted sound pressure level are not licensed by AMCA International.

Technical Specification

- **Section One: Fan Type**

It shall be vane-axial fan with airfoil blades. The fan shall be direct driven and in a cylindrical structure. Behind the impeller in the cylindrical body, there shall be guiding vanes for airflow straightening. The guiding vane shall have a three-dimensional curved surface in line with flow field characteristics for better air performance and static pressure efficiency.

- **Section Two: Impeller**

It shall be an axial impeller with airfoil blades of variable angles to ensure that right models can be selected for various operating conditions. The impeller shall have a vortex hub to effectively control eddy formations and airfoil blades of optimum air performance. Stable airflow and low sound shall be ensured at the maximum running speed. Die formed with cast aluminum, the hub and blades shall be strong enough to maintain operational reliability and safety at a speed 120% of the maximum speed. The impeller shall be dynamically balanced up to G2.5 grade as per AMCA 204 so that its operational stability can be improved and service life extended.

- **Section Three: Fan Housing**

The fan housing shall be made of quality carbon steel and continuously welded and use lap joint flanges. For the fan housing with the impeller diameter of less than 500mm, the carbon steel thickness should be no less than 2mm; For the fan housing with the impeller diameter between 500 and 1000mm, the carbon steel thickness should be no less than 2.5mm; For the fan housing with the impeller diameter of over 1000mm, the carbon steel thickness should be no less than 3mm. All these are to ensure the fan's operational safety and reliability over a long period of time and extend its service life.

- **Section Four: Surface Processing**

The surface of the fan shall be polished to remove any protuberances, welding spatters, burrs, sharp edges and scrap iron. Then it shall undergo the processes of oil removal, pickling, parkerizing, applying putty before being finished with electrostatic epoxy coatings processed under high temperature for strong adhesion. The surface shall be a level one without sags, cracks, cockles or detachment to avoid corrosion over a long period of time.

- **Section Five: Quality Standards**

The fan shall be tested and certified in accordance with AMCA Standard 210 & 300. AMCA Seal for Efficiency Sound and Air Performance shall be tagged on each fan before leaving the factory. The manufacturer shall obtain Production License for National Industrial Products and be certified by ISO9001, ISO 14001 and ISO 45001

● **Section Six: Motor**

It shall be B5 or B14 installation type. The motor is IP55 rated with Class F Insulation (Class H Insulation for Smoke Removal) and Temperature Rise Class B. Lubrication-free ball bearings shall be used. The coefficient of power reserve of the selected motor shall be over 110% to ensure safe operation. As the motor is located inside the fan, it is the supplier that shall provide the appropriate external junction box based on the actual application.

● **Section Seven: Spark Resistant Certification (Only for explosion- proof type)**

The fan shall include AMCA 99 Type C Spark Resistant Construction and an explosion-proof motor. The Ex Certificate of Conformity shall be obtained. The manufacturer shall have the Production License for Explosion-Proof Electrical Products.

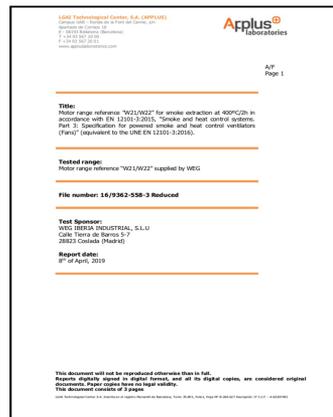

● **Section Eight: Fire Certification (Only for smoke removal type)**

The fans F300 can be supplied to comply with EN 12101-3 smoke requirements of 300 degree C for 120 min. Certificate of Conformity is available from TUV SUD as a witness certificate in Singapore and can be provided by INFINAIR CORP

F400 for motors can be supported for motors to comply with 400 degree C: 120 min in accordance with EN 12101-3, The motor testing certificate can be supported by WEG motors that certified by Applus in Spain

Smoke 300C: 120 min
TUV SUN - Singapore

Motor Smoke Certificate - 400C/120 min
Applus - Spain

● **Section Nine: Nameplate**

A permanently fixed aluminum nameplate shall clearly display the fan number, product model and serial number (unique ID for each fan) so that the parts used can be traceable by customers.

● **Section Ten: Qualified Suppliers**

Qualified suppliers shall be assigned a credit rating of “AAA”. INFINAIR or similar products supplied are designed based on Model YFIAM of INFINAIR.
