

CENTRIFUGAL ROOF EXHAUSTERS**Direct and Belt Driven Models VEDK and VEBK****DESIGNED AND ENGINEERED TO MEET INDUSTRY NEEDS**

The belt drive and direct drive spun aluminum centrifugal power roof ventilator line comprises one of the most complete product offerings available to meet various ventilation applications and specifications.

The Carnes Company has designed the VE series downblast fan to meet the rigorous performance and quality standards demanded by the HVAC industry.

The unique design of these fans recaptures lost energy and transforms it into air flow. The combination of the wheel, venturi and support structure provides maximum ventilation at extended static pressure.

Testing has been conducted to ensure durability and dependability of operation.

**Direct Driven Model VEDK -
Sizes 06 through 18**

Carnes direct drive roof exhausters are available in six sizes with capacities from 150 to 4,300 CFM. The direct drive model reduces fan maintenance. Balancing time may also be decreased with optional electronic speed control. The rigid aluminum construction, integral deep spun venturi and diffuser support frame ensure reliable and efficient operation.

**Belt Driven Model VEBK -
Sizes 06 through 24**

These Carnes power roof ventilators are ideal for medium capacity, medium pressure applications from 200 to 11,400 CFM. The belt drive model provides excellent selection flexibility and readily available motor alternatives at lower initial costs. The diffuser support framework of this design adds to the structural integrity of these units while allowing standard fans to operate at up to 3 inches water gauge static pressure.

**Belt Driven Model VEBK -
Sizes 30 through 54**

Air flow performance capacities of up to 39,000 CFM can be achieved with this ventilator design. These five sizes of the VEBK series feature a circular welded steel support frame and an aluminum wind band. The three piece motor cover simplifies access for maintenance of the motor, belt, sheaves and bearings.

▼ TYPICAL SPECIFICATIONS

Roof exhaust ventilators shall be of the centrifugal belt or direct driven type. The wheel and spun venturi shall be a centrifugal design of spark resistant construction. For maximum performance and quiet, efficient operation, the wheel shall overlap the inlet venturi and have backward inclined blades. The wheels shall be dynamically balanced to assure smooth and vibration-free rotation under maximum loading. The complete drive assembly, including the motor and the wheel, shall be mounted on vibration isolators. Motor and drives shall be factory mounted. All fans shall be test run prior to shipment.

VEBK Belt Drive Series

Motor and drives shall be isolated from the exhaust airstream. Maximum exhaust temperature for continuous operation is 200°F. Air for cooling the motor shall be supplied to the internal motor compartment through louvers from a location free from discharge contaminants. Motors shall be of the heavy duty type with permanently lubricated, sealed ball bearings. Motors shall be readily accessible for maintenance. The wheel shaft shall be ground, polished, coated with a rust inhibitive finish and mounted in heavy duty, permanently sealed pillowblock ball bearings which are capable of 200,000 hours of life, average operation. The drives shall be sized at a minimum of 165% of driven horsepower. Drive belts shall be oil-resistant, non-static and be capable of 25,000 hours of life, average operation. Sheaves shall be fully machined cast iron, keyed and securely attached to the shafts. Variable pitch motor sheaves shall be standard. Two groove sheaves are standard for units with motors 3 HP and larger.

VEDK Direct Drive Series

Motor and drives shall be isolated from the exhaust airstream. Maximum exhaust temperature for continuous operation is 150°F. Air for cooling the motor shall be supplied to the internal motor compartment through louvers from a location free from discharge contaminants. Motors shall be of the heavy duty type with permanently lubricated, sealed ball bearings. Motors shall be readily accessible for maintenance. Wheels to be furnished with integral fitting for wheel puller.

The motor shall be factory wired to the disconnect junction box and a disconnect switch shall be supplied. A conduit chase shall be provided for running electrical wiring through the curb cap into the motor compartment. Field wiring of motor, disconnect and conduit are to be in accordance with electrical specifications and local codes. Heavy-gauge welded galvanized birdscreen shall be furnished.

Horsepower and noise levels shall not exceed the published values and oversized motors will not be acceptable. Performance ratings shall be AMCA licensed for Air and Sound.

Centrifugal power roof ventilators shall be Carnes Company Model VEBK, belt drive, sizes 06 through 54, or Model VEDK, direct drive, sizes 06 through 18, as manufactured at Carnes Company of Verona, Wisconsin.

AMCA LICENSED AIR and SOUND DATA

Licensed to bear the AMCA Seal for both air and sound.

The Carnes Company certifies that the Models VEDK and VEBK shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

UL OPTION

Models VEBK and VEDK are listed to UL Standard 705 and to CSA Standard C22.2 No. 113-12. File Number E27827. UL listing may be optional and must be specified when required.

**POWER
VENTILATOR**

COMPUTERIZED FAN SELECTION: Make the right choice with CARNES FAN-C-LECT™. The Models VEDK and VEBK, as well as the comprehensive offering of CARNES powered ventilators, are included in CARNES user friendly fan selection program.

FAN HOUSING

- Constructed with heavy-gauge aluminum.
- Designed for maximum weather protection, windband and diffusers prevent the entrance of inclement weather.
- Fan hoods beaded for rigidity.
- Interior fan hood lip extended to prevent the entrance of water.
- 3 piece motor cover design (lid, motor tube and fan hood) allows easy access to motor, drives and bearings for maintenance.

MOTOR/ELECTRICAL

- UL listing under Standard 705 available as option on most models.
- Motors are UL recognized components supplied by nationally recognized manufacturers.
- Safety disconnect utility box mounted, switch and cover plate shipped loose for ease of field wiring.
- Sealed conduit chase complies with NEC, allows passage of electrical wire through curb cap into motor compartment.
- Motors through 10 HP mounted as standard.

MOTOR SUPPORT ASSEMBLY

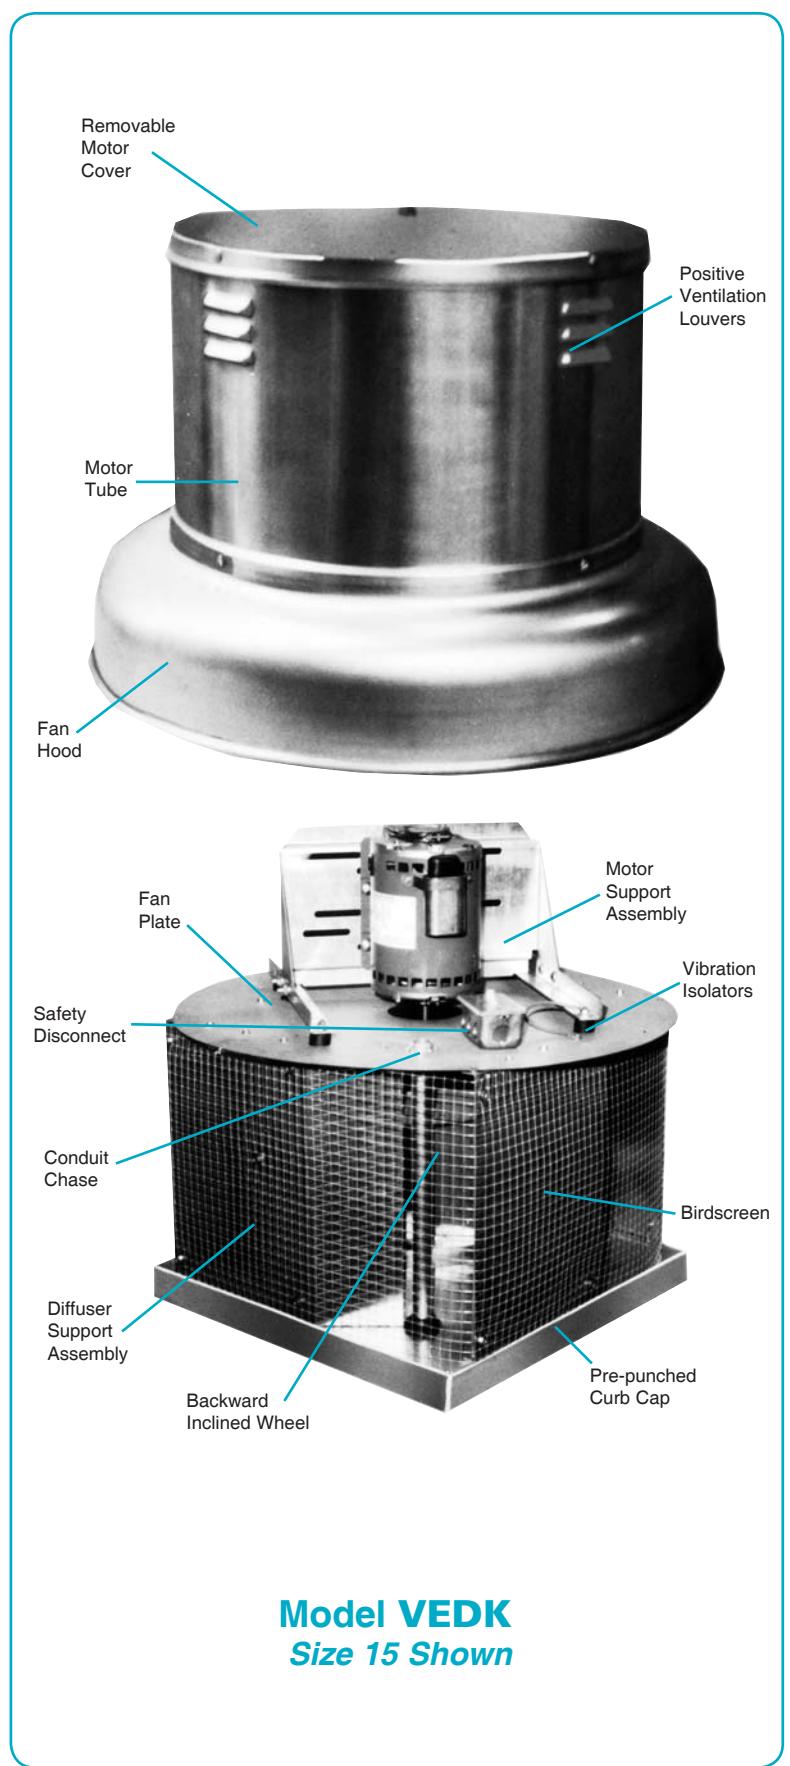

- Bolted, heavy-gauge material.
- Easily adjustable belt tension.
- Motor plate accommodates multiple motor frames.
- Isolated from fan plate to reduce vibration and noise transmission.
- Allows horizontal adjustment of wheel.
- Electrically grounded to meet NEC and UL requirements.

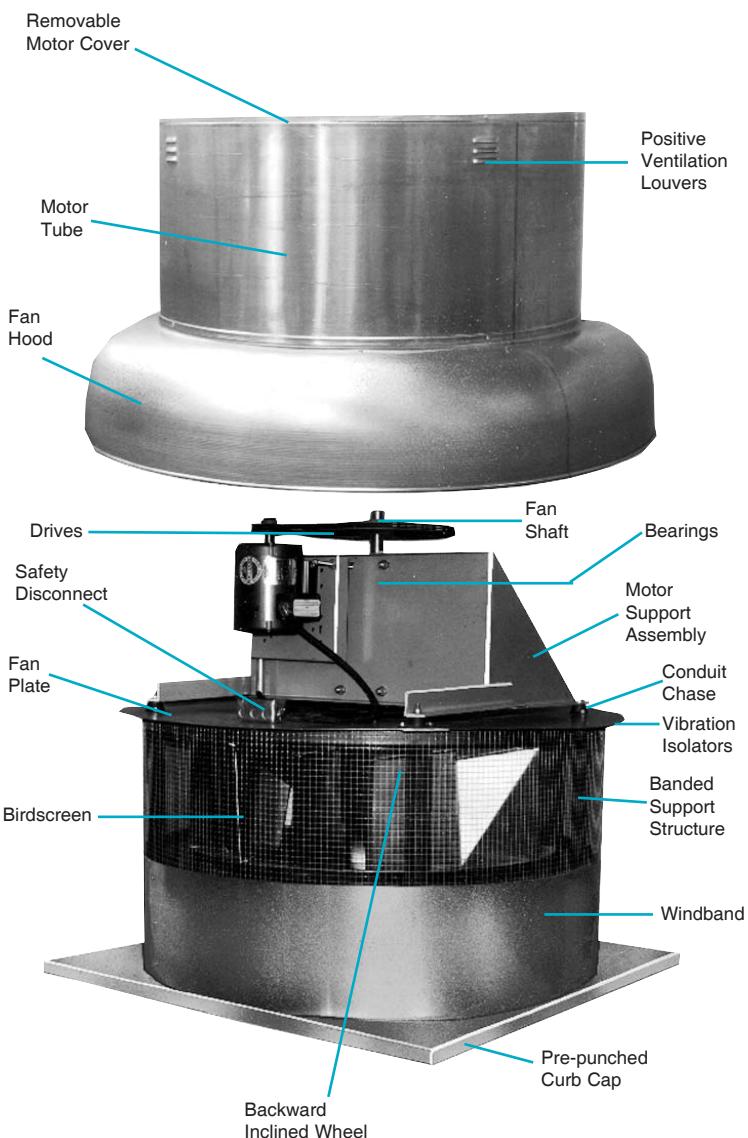

MOTOR COMPARTMENT/TUBE

- Strategically located air intake louvers provide positive motor cooling to maximize motor life.
- Easily removable lid and tube utilize durable threaded fastener retainers.
- Fan plate isolates motor compartment from contaminated exhaust air.
- Opening around shaft sized to allow optimum air passage to ensure proper motor compartment cooling.

BIRDS SCREEN

- 1/2" by 1/2" heavy-gauge welded galvanized birds screen attached to unit with easily removable fasteners.
- Birds screen has a minimal affect on air and sound performance.

Model VEBK
Size 30 Shown

BEARINGS/SHAFT

- Eccentric locking collar bearings standard on sizes 06-18.
- Dual bearings utilized to properly support the fan shaft.
- Prelubricated sealed, self-aligning ball bearing.
- Rated at 200,000 hours average operation.
- Polished CRS fan shaft with rust inhibitive coating.

DRIVES

- Selected for 165% of the motor horsepower.
- Adjustable V-belt drives with oil resistant non-static conducting belts.
- Two belts standard on units 5 HP and larger.
- Factory preset fan RPM.
- Adjustable motor sheave allows for final air system balancing.

WHEEL

- Backward inclined wheel constructed of non-corrosive or coated heavy-gauge material. Wheel sizes 6-24 are aluminum, above 24 are steel.
- Usage of cooling fins on fan wheel (06-18) backplate draws cooling air down over the motor facilitating motor longevity while motor remains out of the airstream.
- Self-limiting power characteristics.
- Dynamically balanced and test run in each individual unit.

SUPPORT STRUCTURE

Sizes 06 - 24

- Galvanized or aluminum patented diffuser provides structural integrity and protection against weather penetration.
- Self-sealing diffuser fasteners prevent leakage.

Size 30 - 54

- Heavy-gauge coated steel circular frame for structural strength and unit rigidity.
- Aluminum windband provides weather protection.

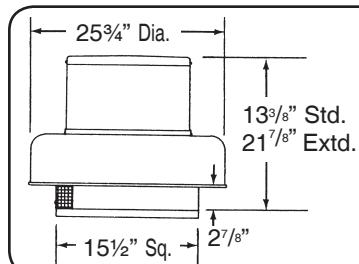

CURB CAP

- One piece construction with fastened, overlapping corners to ensure strength.
- Pre-punched mounting holes for ease of installation.
- Support structure attached with self-sealing fasteners.
- The deep spun venturi is precision matched to the wheel inlet to ensure maximum air flow along with protection from entry of adverse weather.

Performance certified is for installation type A - free inlet, free outlet.
 Speed (RPM) is nominal. Performance is based on actual speed of test.

** To be Speed Controllable, motor must have 115/1 ODP. Other voltages and enclosures are non-speed controllable.

* Base Unit - As run motor speeds.

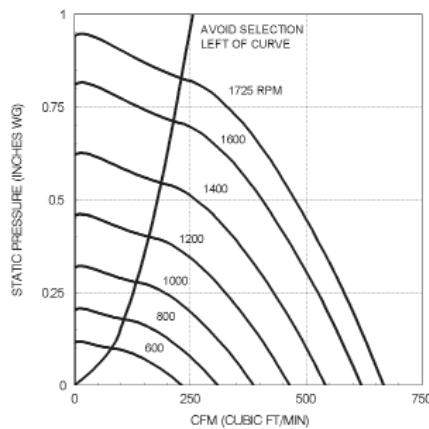

+ RPM range capable with solid state speed control.

Performance ratings do not include the effects of accessories.

The sound power level ratings shown are in decibels, referred to 10^{-12} watts calculated per AMCA Standard 301. Values shown are for inlet L_W sound power levels for installation Type A free inlet, free outlet. Ratings do not include the effects of duct end correction.

The sound ratings shown are loudness values in fan sones at 5 feet (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type A, free inlet hemispherical sone levels.

Performance certified is for installation type A - free inlet, free outlet.
 Performance ratings (bhp) do not include transmission losses.
 Performance ratings do not include the effects of accessories.

The sound ratings shown are loudness values in fan sones at 5 feet (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation type A, free inlet hemispherical sone levels.

Performance certified is for installation type A - free inlet, free outlet.
 Performance ratings (bhp) do not include transmission losses.
 Performance ratings do not include the effects of accessories.

The sound ratings shown are loudness values in fan sones at 5 feet (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation type A, free inlet hemispherical sone levels.

Performance certified is for installation type A - free inlet, free outlet.
 Performance ratings (bhp) do not include transmission losses.
 Performance ratings do not include the effects of accessories.

The sound ratings shown are loudness values in fan sones at 5 feet (1.5m)
 in a hemispherical free field calculated per AMCA Standard 301. Values
 shown are for installation type A, free inlet hemispherical sone levels.

Performance certified is for installation type A - free inlet, free outlet.
Performance ratings (bhp) do not include transmission losses.
Performance ratings do not include the effects of accessories.

The sound ratings shown are loudness values in fan sones at 5 feet (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation type A, free inlet hemispherical sone levels.

Performance certified is for installation type A - free inlet, free outlet.
 Performance ratings (bhp) do not include transmission losses.
 Performance ratings do not include the effects of accessories.

The sound ratings shown are loudness values in fan sones at 5 feet (1.5m)
 in a hemispherical free field calculated per AMCA Standard 301. Values
 shown are for installation type A, free inlet hemispherical sone levels.

Performance certified is for installation type A - free inlet, free outlet.
 Performance ratings (bhp) do not include transmission losses.
 Performance ratings do not include the effects of accessories.

The sound ratings shown are loudness values in fan sones at 5 feet (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation type A, free inlet hemispherical sone levels.

The sound power level ratings shown are in decibels, referred to 10⁻¹² watts calculated per AMCA Standard 301. Values shown are for inlet L_{wi} sound power levels for installation Type A free inlet, free outlet. Ratings do not include the effects of duct end correction. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301.

The sound power level ratings shown are in decibels, referred to 10⁻¹² watts calculated per AMCA Standard 301. Values shown are for inlet L_{wi} sound power levels for installation Type A free inlet, free outlet. Ratings do not include the effects of duct end correction. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301.

COMPUTERIZED FAN SELECTION: Make the right choice with CARNES FAN-C-LECT™. The Models VEDK and VEBK, as well as the comprehensive offering of CARNES powered ventilators, are included in CARNES user friendly fan selection program.

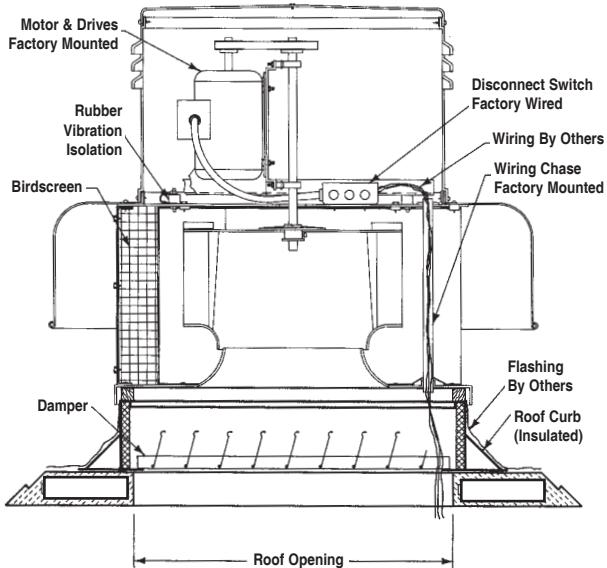

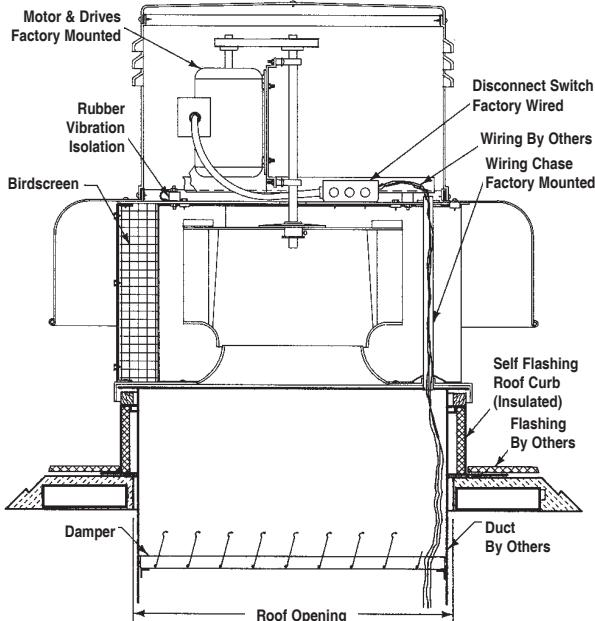

**Figure 1**
**POWER ROOF VENTILATOR
(NON-DUCTED INSTALLATION)**
**Figure 2**
**POWER ROOF VENTILATOR
(DUCTED INSTALLATION)**

Figure 1 shows a typical Model **VEBK** power roof ventilator installation without duct work. The roof flashing is shown installed over standard canted style roof curb. A gravity operated backdraft damper is shown installed on the damper shelf which is located at the base of the roof curb. Power wiring is extended through the roof opening, through the damper conduit knockout, into the fan wiring chase and to the factory wired disconnect switch.

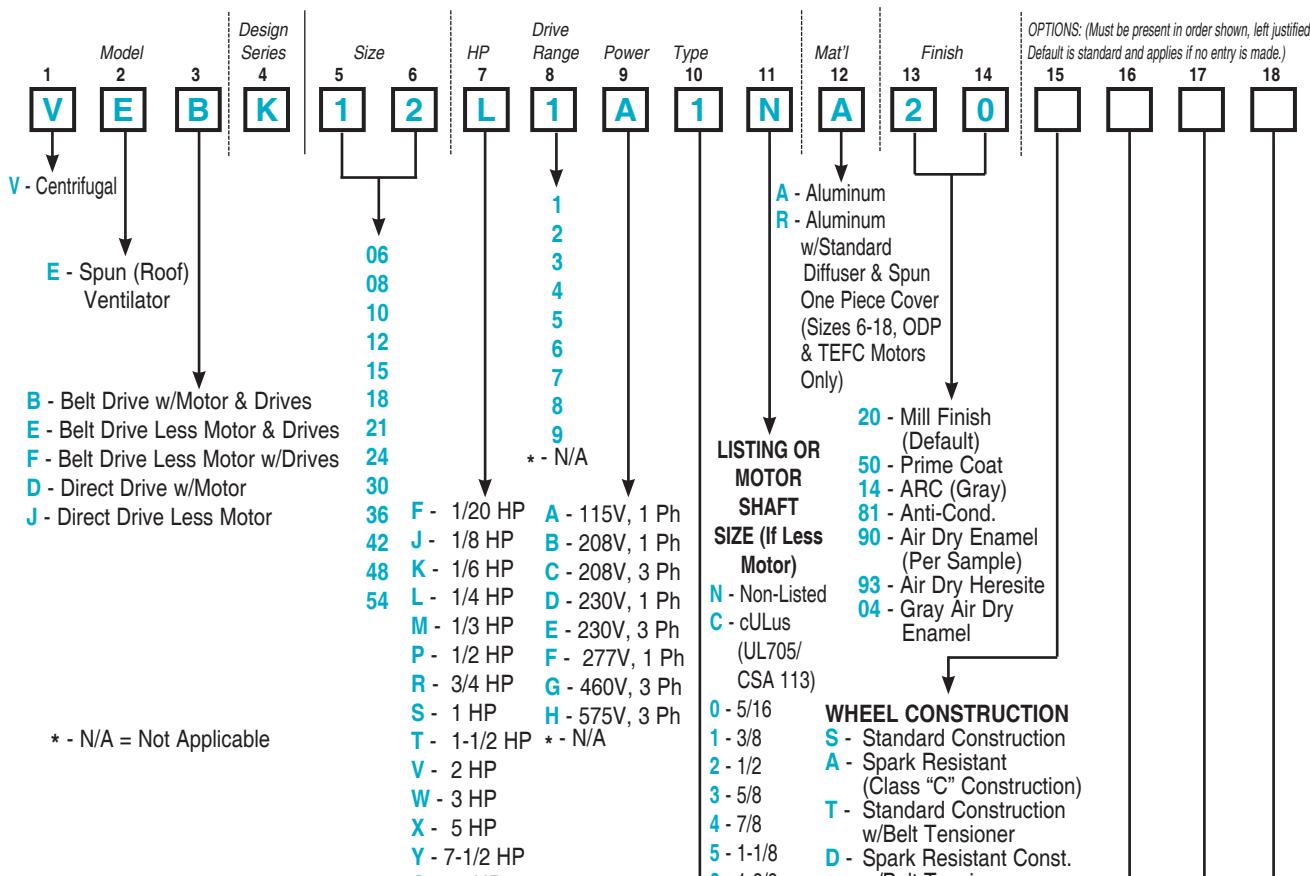

Figure 2 shows a typical Model **VEBK** power roof ventilator installation with an exhaust duct. The duct is shown extending through the roof opening and inside a typical self flashing style roof curb. A gravity operated backdraft damper is shown fastened to a $3/4'' \times 3/4''$ sheet metal angle installed inside the exhaust duct.

Proper fan performance requires uniform and stable air flow at the fan inlet. Avoid transitions, obstructions, elbows or other duct fittings near the fan inlet.

Typical roof curb height is 8" to 12" above the roof deck. Additional height reduces the likelihood of snow or rain entering through the roof opening.

Installation and electrical work should be performed by qualified personnel and must be in accordance with all applicable code requirements.

For protection of personnel, inlet guards are recommended when the fan is within reach (or within 7 feet) of occupied areas or work areas.

- 1 - Open Drip Proof (ODP)
- 2 - 2 Speed /2 Winding ODP (1800/1200 RPM)
- 3 - 2 Speed Totally Enclosed (1800/1200 RPM)
- 5 - Totally Enclosed
- 6 - Explosion Proof (Class I Group D/Class II Group F & G)
- 7 - 2 Speed /1 Winding ODP (1800/900 RPM)
- 8 - High Efficiency - ODP
- 9 - High Efficiency Totally Enclosed

SCREEN

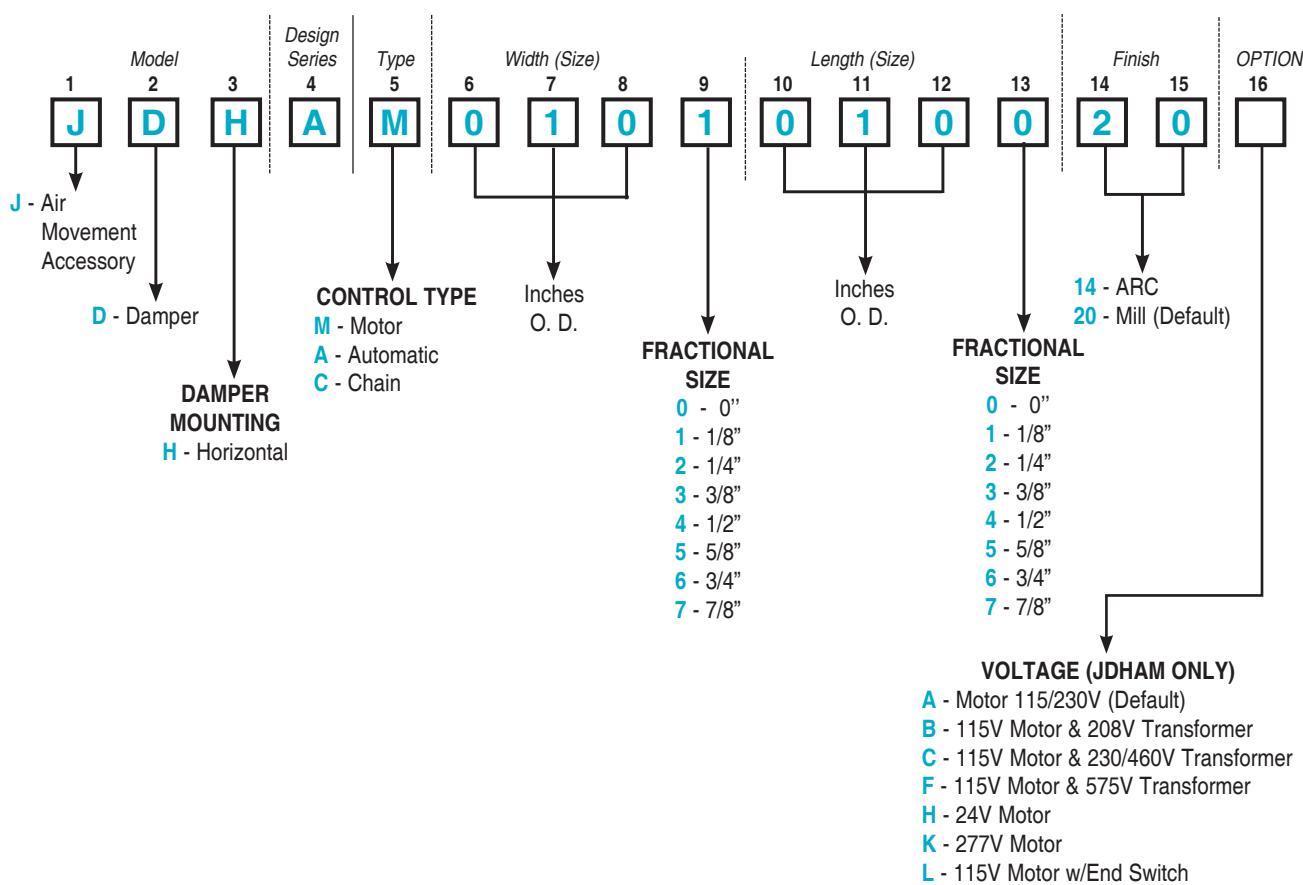

- P - 1/2 X .041 Galv. (Default)
- K - 1/2 x .063 Aluminum
- E - Aluminum Insect Screen
- X - Stainless Steel Birdscreen
- Y - Stainless Steel Insect Screen

1 - Disconnect (Default)
NOTE: Disconnects are standard on all units except those supplied with explosion proof motors or units supplied without motors.

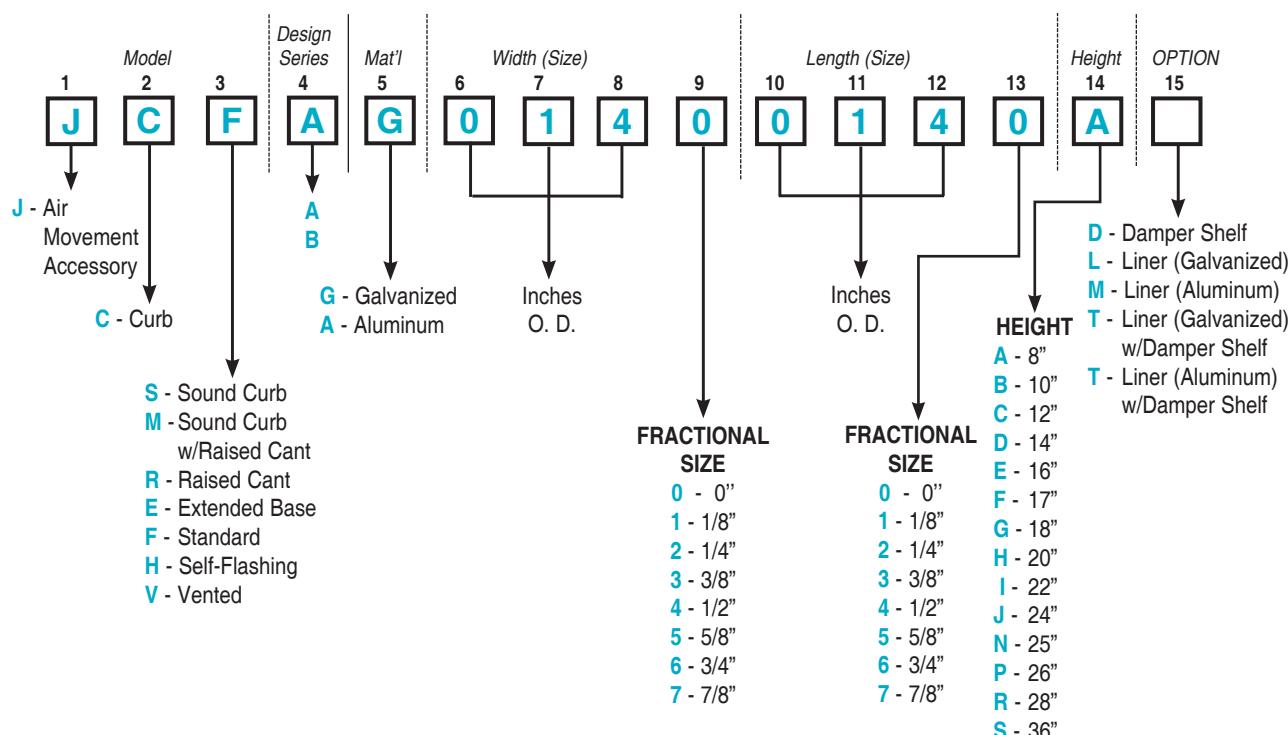

- 1 - Disconnect (Default)
- 2 - Speed Control (3 Amp) - Less Disconnect
- 3 - Speed Control (6 Amp) - Less Disconnect
- 4 - Firestat & Speed Control (3 Amp)
- 5 - Disconnect & Speed Control (3 Amp)
- 6 - Firestat & Disconnect
- 7 - Firestat & Speed Control (6 Amp)
- 8 - Disconnect & Speed Control (6 Amp)
- 9 - Less Disconnect
- F - Speed Control (10 Amp) - Less Disconnect
- M - Disconnect & Speed Control (10 Amp)
- N - Disconnect & Speed Control (5 Amp)
- L - Firestat & Speed Control (10 Amp)
- S - Speed Control (10 Amp R3 Motor Less Disconnect)
- V - Disconnect & Speed Control (10 Amp, R3 Motor)
- T - Firestat & Speed Control (10 Amp R3)
- J - NEMA 3R Disconnect

C - Standard Curb Cap (Default)
H - Hinged Curb Cap
