STANDARD CONSTRUCTION

FRAME
8" (152) deep, 18 gage (1.3) galvanized steel.

BLADES
18 (1.3) gage galvanized steel. Drainable blades are positioned at 37 1/2° angle and spaced approximately 4 1/4" (121) center to center.

SCREEN
1/2" mesh x 19 gage (13 x 1.1) galvanized bird screen in removable frame. Screen adds approximately 1/2" (13) to louver depth.

FINISH
Mill

MINIMUM SIZE
12"w x 12"h (305 x 305).

APPROXIMATE SHIPPING WEIGHT
5 lbs. per sq. ft (24.4 kg/m²)

MAXIMUM FACTORY ASSEMBLY SIZE
64 square feet (6m²) per section, not to exceed 60"w x 120"h (1524 x 3048) or 120"w x 60"h (3048 x 1524).

Louvres larger than the maximum factory assembly size will require field assembly of smaller sections.

SUPPORTS
Louvres may be provided with rear mounted blade supports that increase overall louver depth depending on louver size, assembly configuration or windload.

FEATURES
The LSG6D38 offers:
• 54% Free Area.
• Published performance ratings based on testing in accordance with AMCA Publication 511.
• Drain gutters in each blade and downspouts in jambs and mullions to drain water from louver for minimum water cascade from blade to blade.
• Low pressure drop and low water penetration.
• Hidden vertical blade supports allow continuous blade appearance up to 120"w (3048).
• Economical galvanized steel construction.

VARIATIONS
Variations to the basic design of this louver are available at additional cost. They include:
• Extended sill.
• Hinged frame.
• Front or rear security bars.
• Filter racks.
• Installation angles.
• A variety of bird and insect screens.
• Heavier, 16 gage (1.6) construction.
• Formed stainless steel construction with 18 gage (1.3) or 16 gage (1.6) frame and blades.
• Selection of finishes: prime coat, baked enamel (modified fluoropolymer), and kynar.

FRAME CONSTRUCTION

Dimensions in parenthesis ( ) indicate millimeters.
*Units furnished 1/8" (6) smaller than given opening dimensions.

SUGGESTED SPECIFICATION

Furnish and install louvers as hereinafter specified where shown on plans or as described in schedules. Louvers shall be stationary drainable type entirely contained within a 6" (152) frame. Louvers shall include a drain gutter in each blade and downspouts in jambs and mullions. Louver components (heads, jambs, sills, blades, and mullions) shall be factory assembled by the louver manufacturer. Louver sizes too large for shipping shall be built up by the contractor from factory assembled louver sections to provide overall sizes required. Louver design shall incorporate structural supports required to withstand a wind load of 20 lbs. per sq. ft. (.96kPa) (equivalent of a 90 mph wind [145 KPH] - specifier may substitute any loading required).

Louvers shall be Nystrom Model LSGD38 Construction as follows:
- **Frame**: 18 gage (1.3) galvanized steel
- **Blades**: 18 gage (1.3) galvanized steel positioned at 37 1/2° angle and spaced approximately 4 1/2" (111) center to center.
- **Screen**: 1/8" mesh x 19 gage (13 x 1.1) galvanized steel in removable frame
- **Finish**: Select finish specification from Nystrom/Valspar Finishes Brochure.

Published louver performance data bearing the AMCA Certified Ratings Seal for Air Performance & Water Penetration must be submitted for approval prior to fabrication and must demonstrate pressure drop and water penetration equal to or less than the Nystrom model specified.

PERFORMANCE DATA

AMCA Standard 500 provides a reasonable basis for testing and rating louvers. Testing to AMCA 500 is performed under a certain set of laboratory conditions. This does not guarantee that other conditions will not occur in the actual environment where louvers must operate.

Designs should provide a reasonable safety factor for louver performance by selecting at some point below pressure drop or water penetration system requirements.

WATER PENETRATION

Test size 48" wide x 48" high (1219 x 1219)

Beginning point of water penetration at .01 oz./sq. ft. is 896 fpm (273 m/min).

Airline Louvers certifies that the Louvers shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to air performance and water penetration ratings only.

Free Area Velocity in feet and (meters) per minute

Standard air .075 lb/ft² (.12 kg/m)
