Cincinnati Fan

A Company That Stands Behind Its Product

Since the founding of **Cincinnati Fan** in 1956, the company's mission has been to provide quality products at competitive prices, backed by dependable service.

This mission is carried out by specializing in the market for industrial air handling products up to 125 HP. But specialization does not mean the product line is small. **Cincinnati Fan** offers a wide variety of standard and customized products, production flexibility, and customer responsiveness.

Cincinnati Fan has over 170 experienced sales engineers across the U.S. and Canada ready to serve your air handling needs.

Visit us at www.cincinnati-fan.com for more information.

Cincinnati Fan can provide:

- Technical evaluation for correct performance conditions.
- Review of air stream and ambient conditions that require special attention.
- Selection of proper components to meet required design specifications.
- Selection of proper accessories.
- System analysis for proper fan design.

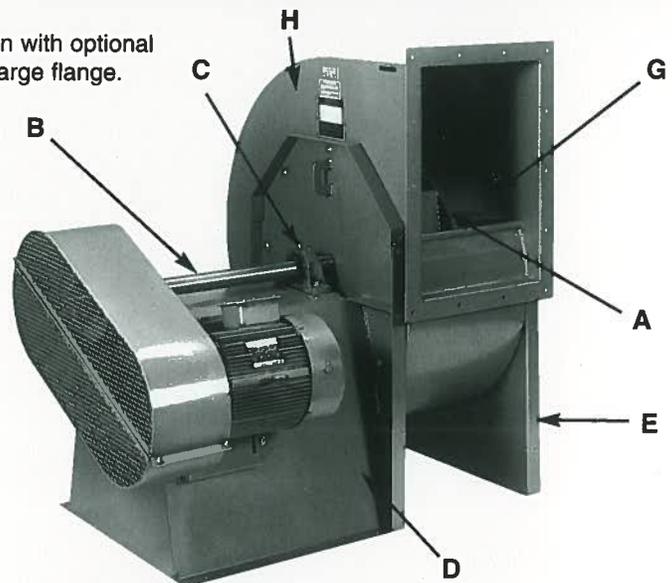

Cincinnati Fan operates in a modern facility specifically designed for world class manufacturing enabling us to build standard products to order, including accessories, and ship within 10 to 15 working days.

With support like this, you can be sure your **Cincinnati Fan** product will be well-built and will provide maximum dependability and longevity.

HDBI FEATURES

- A) Backward inclined blades are fabricated of heavy-gauge, high-strength steel to assure long lasting, efficient operation.
- B) Turned, ground and polished shafting assures smooth operation. A rust preventive coating is applied prior to shipment.
- C) Heavy-duty, self-aligning, relubricatable, ball bearings in cast-iron pillow blocks. Bearings are selected for optimal performance depending on fan size and class.
- D) Bearing base is heavy steel construction with internal supports to maximize rigidity and assure long equipment life. Arrangement #1 fans can be converted to arrangement #9 with the addition of the motor slide base.
- E) Inlet side support is used to assure a vibration-free, stable housing.
- F) Slip collar inlet (not shown) is used for duct work connection. Flanged inlet optional.
- G) Inlet bell is designed for smooth air entrance into the wheel inlet for maximum efficiency.
- H) Reversible housing provides increased configuration flexibility. Removable side plates allow the wheel to be removed from the motor or inlet side of the housing. Housings are rotatable in 45 degree increments. Wheels are not reversible. See note at right.

Shown with optional discharge flange.

NOTE: HDBI-330 and HDBI-360 housings are not rotatable or reversible.

ADVANTAGES OF DIRECT DRIVE ARRANGEMENT #4 & #4HM

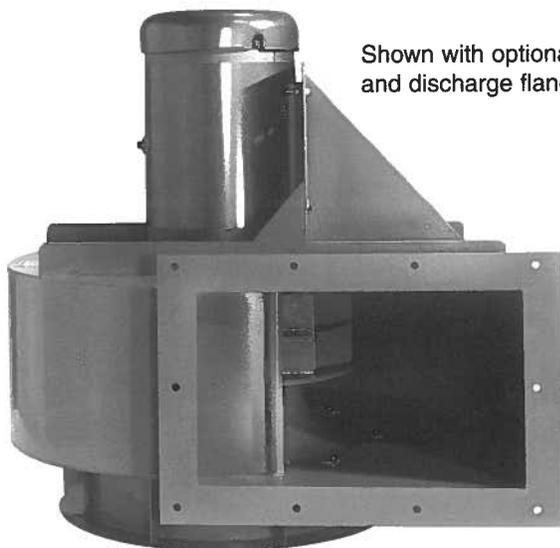

All sizes available with 2 wheel diameters in 100% to 50% widths in 5% increments

Shown with optional inlet and discharge flanges.

ADVANTAGES

- Compact - requires less space.
- Weighs Less - requires less supporting structure.
- Less Maintenance - no belts or fan bearings to replace.
- Less Expensive - above features result in lower first cost and lower maintenance cost.
- More Ratings - the combination of several motor speeds, two wheel diameters and eleven fan widths results in a vast selection of direct drive ratings.
- Temperature - good up to 200°F. (93°C.)

Shown with optional inlet and discharge flanges.

OPTIONAL ARRANGEMENT 4HM HORIZONTAL MOUNTING

Ideal for bag house or other equipment requiring the simplicity of a horizontally mounted fan. Motors are limited to frame 365T maximum.

This mounting is available on all sizes. All horizontal mount housings are non-reversible. Inlet flange is optional and must be added if required. Supporting equipment must be adequate to support weights shown on page 26 plus motor weight.

SIX STANDARD ARRANGEMENTS

ARRANGEMENT 1 (V-BELT DRIVE)

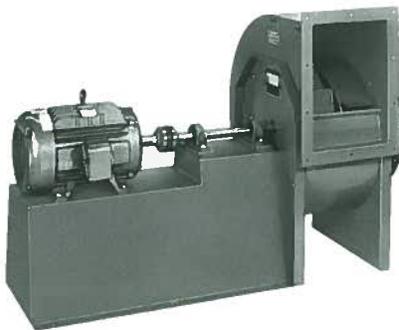

- Motor not mounted on bearing base.
- Wheel mounted on fan shaft with two pillow block bearings.
- Maximum temperature of standard design: 300°F. (149°C.); high temperature designs up to 750°F. (398°C.)

(Shown with optional discharge flange.)

ARRANGEMENT 4 (DIRECT DRIVE)

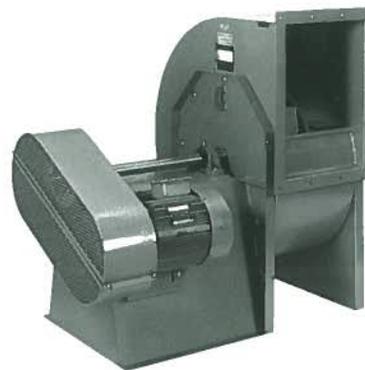

- Motor mounted on motor base.
- Wheel mounted on motor shaft.
- Maximum temperature of standard design: 200°F (93°C.); high temperature design not available.

(Shown with shaft/coupling guard removed and optional discharge flange.)

ARRANGEMENT 8 (DIRECT DRIVE)

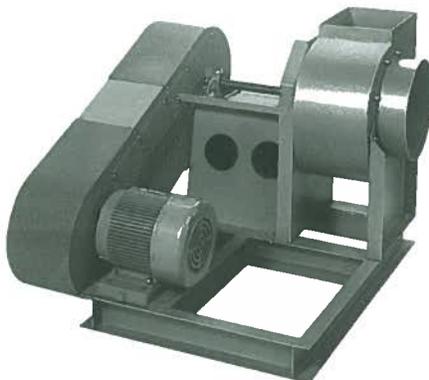

- Motor mounted on motor base extending beyond the bearing base. Shaft/coupling guard is standard.
- Wheel mounted on fan shaft with two pillow block bearings.
- Maximum temperature of standard design: 300°F. (149°C.); high temperature designs up to 750°F. (398°C.)

(Shown with optional discharge flange.)

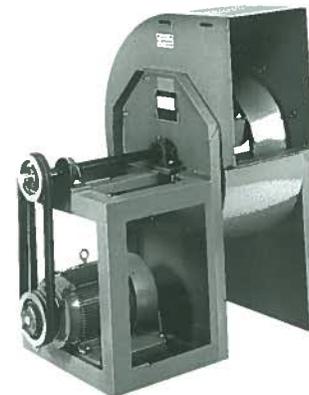

ARRANGEMENT 9 (V-BELT DRIVE)

- Motor mounted on an adjustable slide base on the side of the bearing base.
- Wheel mounted on fan shaft with two pillow block bearings.
- Maximum temperature of standard design: 300°F. (149°C.); high temperature designs up to 750°F. (398°C.)

ARRANGEMENT 9CB (V-BELT DRIVE)

- Same as Arrangement 9 except motor and fan are mounted on a common channel base.
- Maximum temperature of standard design: 300°F. (149°C.); high temperature designs up to 750°F. (398°C.)

(Shown with weather cover removed)

ARRANGEMENT 10 (V-BELT DRIVE)

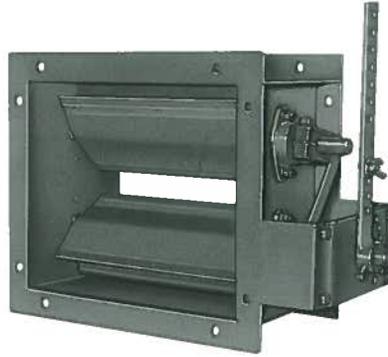

- Motor mounted on adjustable base under the fan shaft.
- Wheel mounted on fan shaft with two pillow block bearings.
- Maximum temperature of standard design: 300°F. (149°C.); high temperature design not available.

OPTIONAL ACCESSORIES

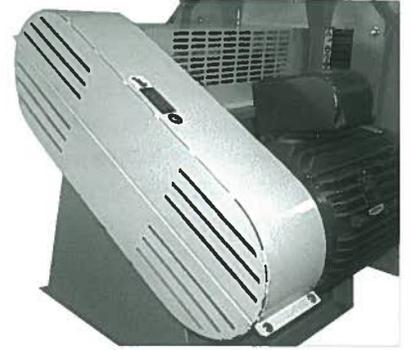

Shaft Seal

Teflon shaft seal good to 400°F. (204°C.) Ceramic fiber gasket material with steel cover plate above 400°F. (205°C.)

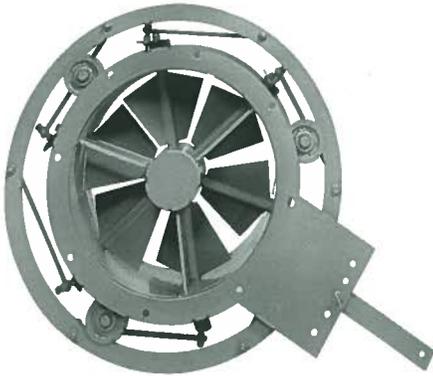

Outlet Damper

All dampers are 1 or 2 blade. All dampers 10" deep flange to flange. Opposed blade construction is standard.

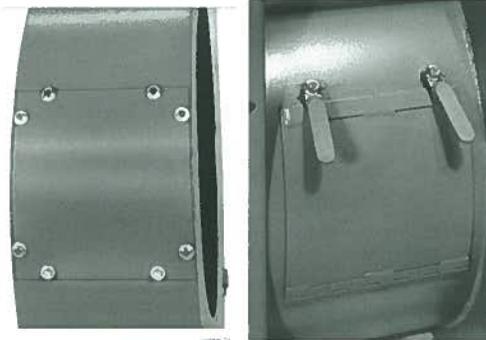

Belt Guard

Belt guard standard on Arrangement 9 and 9CB only. Painted safety yellow.

Inlet Vane Control

Linkage assembly is external on smaller sizes, internal on larger sizes. Inlet vane depth varies with inlet diameter. Contact your local Cincinnati Fan sales representative for dimensions.

Inspection Door

Bolted or quick-release doors positioned as specified on scroll. Rubber gasket standard up to 250°F. (121°C.) Ceramic fiber gasket standard at temperatures above 250°F. (122°C.)

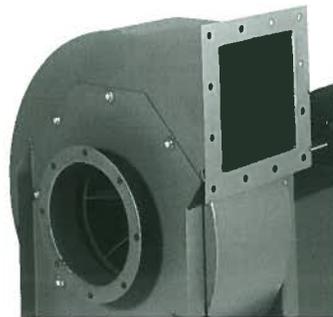

Drain Connection

3/4" pipe coupling welded to lowest point of housing. Not required on BH discharge position.

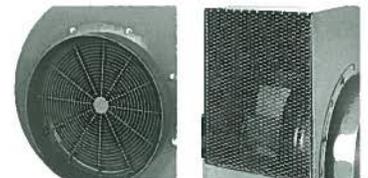

Shaft and/or Heat Slinger Guard

Guard available on Arrangement 1, 9 and 9CB. Covers bearings and shaft between fan housing and belt guard. Has extended lube lines. Standard on high temperature fans above 301°F. (150°C). Painted safety yellow.

Inlet & Outlet Flanges

Flanges on inlet and outlet available where installation requires tight duct connections. Standard hole pattern furnished. Outlet flange not available on some discharge positions. Outlet flange standard on all sizes 270 through 360. See page 31 for dimensions.

Inlet & Outlet Guards

Ring guard on inlet and expanded metal on discharge. Meet OSHA approval.

DANGER

All fans & blowers shown have rotating parts and pinch points. Severe personal injury can result if operated without guards. Stay away from rotating equipment unless it is disconnected from its power source.

Read operating instructions.

SPARK-RESISTANT CONSTRUCTION

Type A: All parts in contact with airstream are of nonferrous material. (*Contact your local Cincinnati Fan sales representative*).

Type B: Fabricated aluminum wheel and aluminum rubbing ring on motor shaft or fan shaft. **Maximum Temperature 200°F. (93°C.) all arrangements.**

Type C: Consists of aluminum inlet bell and aluminum plate on drive side of the fan. Maximum Temperature is the same as for high temperature construction below for each arrangement.

Maximum RPM for Aluminum Wheels*	
Size	Max. RPM
120	5400
130	4999
150	4712
160	4285
180	3885
200	3574
220	3550
240	2837
270	2476
300	2300
330	2300
360	1950

* Up to 200°F. (93°C.) Consult your local Cincinnati Fan sales representative for higher temperatures and/or higher RPMs.

WARNING

The use of aluminum or aluminum alloys in the presence of steel which has been allowed to rust requires special consideration. Research by the U.S. Bureau of Mines and others has shown that aluminum impellers rubbing on rusty steel may cause high intensity sparking.

The use of the above Standard in no way implies a guarantee of safety for any level of spark resistance. Spark-resistant construction also does not protect against ignition of explosive gases caused by catastrophic failure or from any airstream material that may be present in a system.

HIGH TEMPERATURE CONSTRUCTION

Standard Construction: Arrangements 1, 8, 9, 9CB and 10 suitable to 300° F. (149° C.)
Arrangements 4 and 4HM suitable to 200° F. (93° C.)

201°- 400° F. (94° - 204° C.) Construction: Standard fan with heat slinger, slinger guard, teflon shaft seal and extended hub on wheel. Arrangements 4 and 4HM only.

301°- 400° F. (150° - 204° C.) Construction: Standard fan with heat slinger, fan shaft and slinger guard and teflon shaft seal. Arrangements 1, 8, 9 and 9CB.

401°- 600° F. (205° - 316° C.) Construction: Standard fan with heat slinger, fan shaft and slinger guard, high temp shaft seal, gaskets and paint. Arrangements 1, 8, 9 and 9CB.

601°- 750° F. (317° - 398° C.) Construction: Standard fan with high temp bearings, heat slinger, fan shaft and slinger guard, high temp shaft seal, gaskets and paint. Arrangements 1, 8, 9 and 9CB

TEMPERATURE RANGE	MAXIMUM RPM REDUCTION FACTOR†
Up to 175°F.	0%
176°-200°	2%
201°-300°	4%
301°-400°	7%
401°-500°	11%
501°-600°	15%
601°-700°	20%
701°-750°	30%

† Steel wheels only.

Fan performance tables are developed using standard air which is 70°F., 29.92" barometric pressure and .075 lbs. per cubic foot. Density changes resulting from temperature or barometric pressure variations (such as higher altitudes) must be corrected to standard conditions before selecting a fan based on standard performance data. Temperature and/or altitude conversion factors are used in making corrections to standard conditions.

EXAMPLE:

Select a belt driven HDBI-300 to deliver 8327 CFM at .50" SP at 200°F. (93°C.), and 7000' altitude.
STEP 1. From the table, conversion factor is 1.63.
STEP 2. Correct static pressure is: 1.63 x .50" SP = .81" SP at standard conditions.
STEP 3. Check HDBI catalog for 8327 CFM at .81" SP. We select a belt driven HDBI-300 and interpolation gives 660 RPM and 1.83 BHP.
STEP 4. Correct the BHP for the lighter air: 1.83 ÷ 1.63 = 1.12 BHP. A 1.5 HP motor will suffice at 200°F., and 7000' but not at standard conditions. Special motor insulation may be required due to altitude.

Performance certified is for installation type B-Free inlet, Ducted Outlet.
Performance ratings do not include the effects of appurtenances (accessories).

† See pages 25 or 26 for minimum motor frame sizes regardless of BHP.

Cincinnati Fan & Ventilator Company certifies that the HDBI Heavy Duty Backward Inclined Fans shown on this page and on pages 12 through 23 are licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

Fans are capable of operating to the maximum safe speeds shown on each performance table. These speeds permit obtaining the minimum SP/OV limits established as follows:

- CLASS II - 8.5" SP at 3000 FPM to 4.25" SP at 4175 FPM.
- CLASS III - 13.5" SP at 3780 FPM to 6.75" SP at 5260 FPM.
- CLASS IV - 20" SP at 4600 FPM to 10" SP at 6400 FPM.

DIRECT DRIVE RATING TABLES

for partial width fans with two wheel types

The partial width fan ratings shown on this page and on Pages 9,10 and 11 were derived from tests performed in accordance with AMCA Publication 211 and fan laws were applied to arrive at the data shown for partial width fans. However, none of the partial width fans or fans with SQBI wheels are licensed to bear the AMCA seal. All 100% width fans with HDBI wheels are licensed to bear the AMCA seal as shown on pages 7 and 12 through 23.

DIRECT DRIVE RATING TABLES (cont'd)

The partial width fan ratings shown on this page and on Pages 8, 9 and 11 were derived from tests performed in accordance with AMCA Publication 211 and fan laws were applied to arrive at the data shown for partial width fans.

However, none of the partial width fans or fans with SQBI wheels are licensed to bear the AMCA seal.

All 100% width fans with HDBI wheels are licensed to bear the AMCA seal as shown on pages 7 and 12 through 23.

Performance certified is for installation type B - Free inlet, Ducted Outlet. Performance ratings do not include the effects of appurtenances (accessories). Power rating (BHP) does not include transmission losses.

HDBI-160

WHEEL
Dia. - 16.50"

OUTLET O.D.
Size - 12.50" x 18.38"
Area - 1.54 Sq. Ft. I.D.

INLET O.D.
Size - 18.00"
Area - 1.73 Sq.Ft. I.D.

BELT DRIVE RATING TABLES

Ratings at 70°F., .075 Density, Sea Level

All wheels are HDBI type
Class II = light face above Class III
Class III = bold face
Class IV = italic face below Class III

BELT DRIVE RATING TABLES

Ratings at 70°F., .075 Density, Sea Level

All wheels are HDBI type
Class II = light face above Class III
Class III = bold face
Class IV = italic face below Class III

SEE PAGE 24 FOR MAX. WHEEL RPM & WR².

① Add 1/8" for AMCA "C" Construction fans and/or Downblast discharge position.

② Dimensions shown are for 100% width housings. For partial width housings, contact your local Cincinnati Fan sales representative.

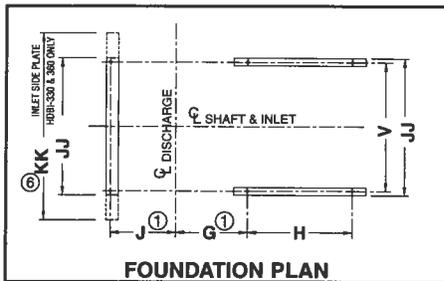

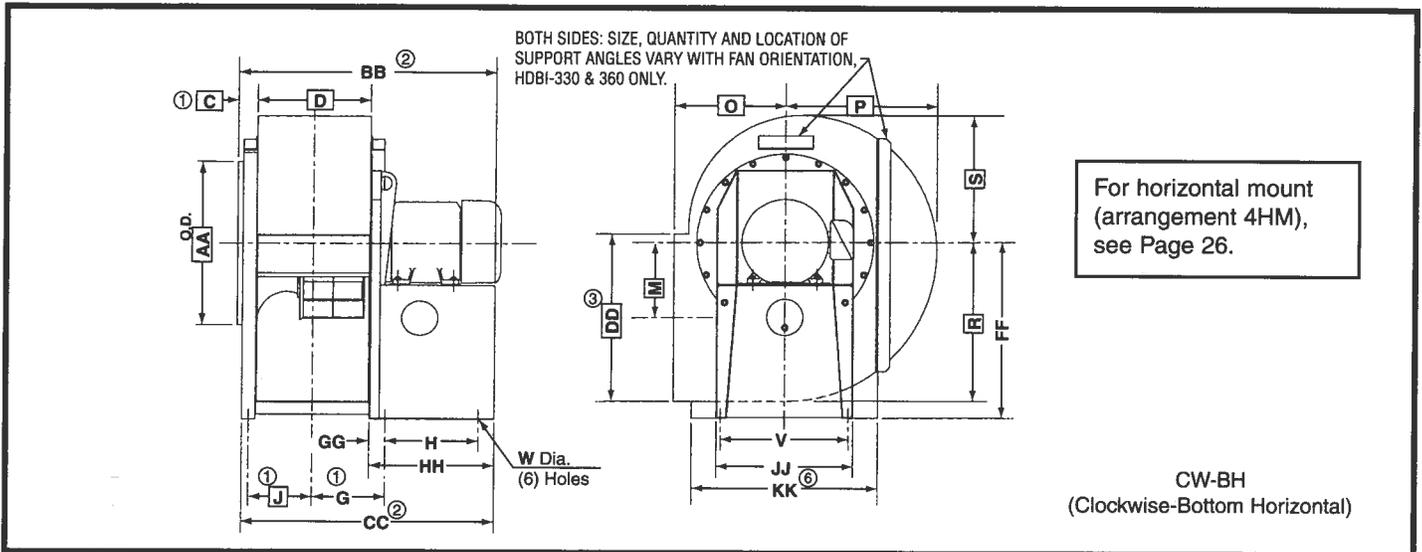

③ Discharge flange is standard on Models HDBI-270 through HDBI-360. See page 31 for dimension.

★ HDBI-330 & 360 have fixed housings and are therefore not rotatable in the field.

DIMENSIONS and SPECIFICATIONS

Arrangement #4, Direct Drive

- ① Add 1/8" for AMCA "C" Construction fans and/or Downblast discharge position.
 - ② Add 1/4" for AMCA "C" Construction fans and/or Downblast discharge position.
 - ③ Discharge flange (not shown above) is standard on Models HDBI-270 through HDBI-360. See page 31 for dimensions.
 - ⑥ Inlet side plate width for HDBI-330 & 360. Inlet side plate for HDBI-120 to HDBI-300 is same width as "JJ" dimension.
- NOTE: HDBI-120 to 300 are reversible and rotatable in 45° increments but wheels are not reversible. **HDBI-330 AND 360 ARE NOT ROTATABLE OR REVERSIBLE.**

DIMENSIONS IN INCHES ± 1/8"

NOTE: For common boxed blower housing dimensions, see Page 24.

DIMENSIONS and SPECIFICATIONS

Arrangement #4HM, Direct Drive

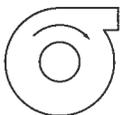

- ① Add 1/8" for AMCA "C" Construction.
- ② Optional inlet flange may be added to assist in fan installation. See page 31 for flange dimensions.
- ③ Discharge flange is optional on Models HDBI-120 through HDBI-240 and is standard on Models HDBI-270 and HDBI-300. See page 31 for flange dimensions.

* See (*) on page 31.

DIMENSIONS and SPECIFICATIONS

Arrangement #1 and #9, Belt Drive (specify 9R or 9L.)

- ① Add 1/8" for AMCA "C" Construction fans and/or Downblast discharge position.
- ② Add 1/4" for AMCA "C" Construction fans and/or Downblast discharge position.
- ③ Discharge flange (not shown above) is standard on Models HDBI-270 and HDBI-300. See page 31 for dimensions.
- ④ MML IS MAXIMUM MOTOR LENGTH ON CUSTOMER SUPPLIED MOTOR. MOTOR MANUFACTURERS "C" DIMENSION CANNOT EXCEED "MML" WITHOUT A SPECIAL BASE.

NOTE: Housings are reversible and rotatable in 45° increments.
Wheels are not reversible.

DIMENSIONS IN INCHES ± 1/8"

NOTE: For common boxed blower housing dimensions, see Page 24

⚠ DANGER

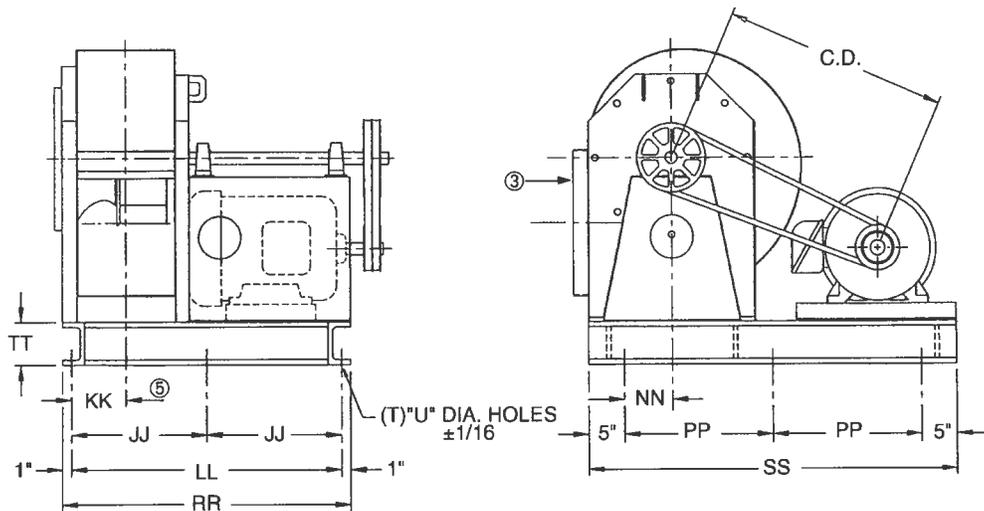

All fans & blowers shown have rotating parts and pinch points. Severe personal injury can result if operated without guards. Stay away from rotating equipment unless it is disconnected from its power source.

Read operating instructions.

DIMENSIONS and SPECIFICATIONS

HDBI-120 to 360, Arrangement #9RCB or #9LCB Channel Base, Belt Drive

Unit shown is arrangement 9RCB (motor on right side). For motor on left side, specify arrangement 9LCB.
Channel base arrangements not available in down blast or 45° bottom angular down discharge positions.

DIMENSIONS IN INCHES ± 1/8"
